HRA BID INVITATION

PART 1 GENERAL

1.01 CONTACT TRANSLATION

A. In Hmong - Ceeb toom. Yog koj xav tau kev pab txhais cov xov no rau koj dawb, Amy Filice 651-266-6568;

B. In Spanish - Atención. Si desea recibir asistencia gratuita para traducer esta información, llame a Amy Filice 651-266-6568;

C. In Somali - Ogow. Haddii aad dooneyso in lagaa kaalmeeyo tarjamadda macluumaadkani oo lacag la' aan wac, Amy Filice 651-266-6568.

1.02 PROJECT SUMMARY

A. Project description: This is a Residential Renovation project located at HRA Master Specification **886 Case Ave, St Paul**. This project is funded by Neighborhood Stabilization Program through the The Housing and Redevelopment Authority of Saint Paul, Minnesota. This project is not required to conform to Federal and/or Little Davis Bacon requirements.

1.03 NOTICE TO PROSPECTIVE BIDDERS

A. These documents constitute an invitation to bid to General Contractors for the construction of the project described within this bid manual.

1.04 OWNERSHIP INFORMATION

A. The Owner, The Housing and Redevelopment Authority of Saint Paul, Minnesota, hereinafter, referred to as Owner.

B. Owner's Project Manager: Marty McCarthy
Address: 25 West Fourth Street, Saint Paul, MN 55102, Suite 1100
Phone Number: 651-266-6552
Email: marty.mccarthy@ci.stpaul.mn.us

1.05 OWNER'S CONSULTANT(S)

Owner's Project Specification Consultant: Marpedevelopment

1. Specification Writer's Name: Mark Pasvogel Jr
2. Address: 2233 Hameline Ave N, Roseville MN 55113 Suite 125
3. Phone Number: 651-226-5060
Email: Mark@marpedevelopment.com

A. Owner's Construction Manager Consultant: Marpedevelopment

1. Construction Manager's Name: Mark Pasvogel Jr
2. Address: 2233 Hameline Ave N, Roseville MN 55113 Suite 125
3. Phone: 651-226-5060
4. Email: Mark@marpedevelopment.com

1.06 IMPORTANT BID DATES

A. Bids Issued: 9/14/12

B. Mandatory Pre-Bid Site Tour: Insert 09/20/2012 from 10:30 am to 12:00 pm

C. **BID DUE DATE ON OR BEFORE:** 10/5/2012 no later than insert time 2:00 PM local time.

D. Bid Delivery Location: The offices of The Housing and Redevelopment Authority of Saint Paul, Minnesota
Address: 25 West Fourth Street, Saint Paul, MN 55102, Suite 1100
Suite: 1100

E. Public Bid Opening and Location: The Housing and Redevelopment Authority of Saint Paul, Minnesota: Suite 1100 Address: 25 West Fourth Street, Saint Paul, MN 55102, Suite 1110 and bid opening at 2:00

SECTION 00 4003

HRA INSTRUCTIONS FOR BIDDERS

PART 1 GENERAL BID DIRECTIONS

1.01 Each Bidder shall fully inform him / herself and any subcontractors prior to bidding as to all existing conditions and limitations including compliance requirements under which the work is to be performed and shall include in the bid a sum to cover the cost of all items necessary to perform the work as set forth in the Bid Project Manual. The submission of a bid shall be construed as conclusive evidence that the Bidder has made such examination.

1.02 Bid Forms

A. The Bid Submission forms are available online at http://www.stpaul.gov/nsp.

B. Each bid must be submitted on the Bid Submission forms identified in the provided checklist. It is expected that the Contractor retain a copy of their entire submittal for their records. The copy of the bid submitted must be signed at every place that a signature is requested.

1.03 Corrections

A. Erasures or other changes in the bid must be dated and initialed over the signature of the bidder.

1.04 Bid Envelope

A. Place bid in envelope with the contractor name and address in the upper left-hand corner as the return address, and list the property address in the middle of the envelope as the addressee. Seal envelope.

1.05 Interpretations of Scope of Work

A. Every request for an interpretation shall be in writing, unless otherwise documented by the Specification Writer. Questions will be taken until 3 days before bids are due.

B. Interpretations will be in the form of an addenda which will be on file at the website, and in the offices of the Specification Writer at least three calendar days before bids are opened.

C. It shall be the bidder's responsibility to make inquiry as to addenda issued.
   1. All such addenda shall become a part of the contract and all bidders shall be bound by such addenda.

1.06 Conflict with Documents

A. When a conflict arises between the Drawings or the Scope of Work, the Drawings shall govern.

1.07 Materials Approved:

A. Where items of equipment and material are specifically identified herein by a trade name, model or catalog number, only such specified items may be used in the base bid.

B. Contractors desiring approval of substitute products may submit data cut sheets and product information for approval during the bidding cycle.

C. Contractors will be notified only by addendum of additional approved products.

D. Material identifications made in work specifications are considered as minimal quality for acceptance in bidding and installation.

1.08 Allowances:

A. The Contractor shall include in the bid proposal the cash allowances listed.

B. Unless otherwise indicated, the lump sum amount shall be for the material / product.

C. Labor to install the material / product must be submitted separately.

1.09 Alternates:

A. The Contractor must submit bids for each alternate listed in the Alternates List.

B. If pricing is not listed for Alternates the bid may be disqualified.

SECTION 00 4101

HRA BID SUBMISSION DOCUMENTS

SECTION 01 0010

HRA GENERAL REQUIREMENTS

PART 1 GENERAL

1.01 CONTRACTOR'S RESPONSIBLITY

A. All labor, material, supplies, tools, or other costs or items needed for complete construction of the project, including permits, temporary facilities, safety, security and utilities during construction, are the responsibility of the Contractor.

B. The General Contractor and each Subcontractor shall inspect the existing conditions that affect its work before starting. Commencing work signifies acceptance of the previous work. All measurements and dimensions indicated in the Drawings and Specifications are to be verified prior to bid submittal and construction.

C. The General Contractor shall be responsible for the coordination of all subcontractors working on, or furnishing material for use on this project. In addition, the General Contractor shall be responsible for the coordination of all work performed under separate contracts.

1.02 CONTRACTOR'S USE OF PREMISES

A. During the construction period the General Contractor and its Subcontractors shall have full use of the premises for construction operations, including use of the site. All use of the site shall be under control and supervision of the General Contractor.

B. General Contractor and its Subcontractors will be limited to construction work between the hours of 7:00 am and 6:00 pm on weekdays and 8:00 am to 4:00 pm on Saturday. Work at any other times will be allowed only with the Owner's and Project Manager's consent.

1.03 MATERIALS & MATERIAL STORAGE

A. The General Contractor shall provide all materials, hardware, and fixtures required to accomplish the Scope of Work, unless otherwise indicated.

B. The General Contractor shall use materials specified throughout unless approved in writing by Owner and Project Manager before ordering and installing.

C. The General Contractor is responsible for verification of all measurements. Materials transported to the job site and stored are the General Contractor's responsibility until installed and accepted by the Owner and Project Manager.

D. The General Contractor shall deliver, store, and handle products according to the manufacturer's recommendations, using means and methods that will prevent damage, deterioration, and loss, including theft.

E. Damaged or stolen materials and equipment must be replaced as part of the work at no additional cost to the Owner. Damaged property that is removed shall belong to the General Contractor, unless otherwise stated in writing.

PART 2 PERFORMANCE REQUIRMENTS

2.01 ENERGY CONSERVATION

A. General
   1. This property must go through Xcel Energy's Home Performance with Energy Star program.
   2. This means that all insulation and HVAC work must be performed by Xcel Energy's approved contractor list.
   3. General Contractors that are on the Home Performance list may choose Subcontractors that are not on the list, but those General Contractors will be held responsible for all work completed.
   4. The "Specifications for Energy Improvement Upgrades" provided by the Neighborhood Energy Connection (See appendix) are a part of the Scope of Work for this property.
   5. Any discrepancies between the Scope of Work and NEC's specifications are to be clarified during the bid process.

B. Provide Energy Efficient Lighting
   1. All fixtures should have energy efficient CFLs or LED lamps that are within the maximum wattage allowable.
   2. The Owner and Project Manager shall select specific locations of fixtures and switches in each area.
   3. All lighting fixtures will be purchased new, unless otherwise indicated in the scope of work.
   4. No plastic lighting fixtures are acceptable.
   5. No fluorescent tube light fixtures are acceptable in living spaces.
   6. Provide light bulbs for all fixtures. All light fixtures are to have color corrected bulbs. Light bulbs that are viewable within fixtures will be a globe or candelabra style CFL.
   7. Provide and install lighting fixtures and switches.
   8. Review fixtures with Owner and Project Manager prior to installation.
   9. All electrical outlets and cover plates are to be replaced throughout the building, unless otherwise indicated in the scope of work.

2.02 ENERGY EFFICIENT APPLIANCES

A. All appliances must be purchased new and be Energy STAR certified or high efficiency models when Energy STAR certification is not possible.

B. High-efficiency appliances meet the following standards:

C. Clothes washers must have a CEE Tier 2 or higher, a minimum Energy Factor of 2.0 or greater, and a water factor 6.0 or less.

D. Clothes Dryers must be a minimum 7.0 cubic feet capacity, have a sensor dry system, and have 5 Temperature Levels - High, Medium High, Medium, and Low & Ultra Low

E. Dishwashers must be CEE Tier 2 or higher, with a minimum Energy Factor of 0.68 or greater, and a maximum annual energy use of 325 kilowatt-hours or less.

2.03 LOW FLOW PLUMBING FIXTURES

A. New plumbing fixtures should be water conserving fixtures with a faucet flow rate of 2.0 GPM or less and a commode flush rate of 1.3 GPF or less.

PART 3 PRICE AND PAYMENT PROCEDURES

3.01 SCHEDULE OF VALUES

A. Form to be used: Sworn Construction Statement.

3.02 APPLICATIONS FOR PROGRESS PAYMENTS

A. Payment Period: Submit at intervals stipulated in the Agreement.

B. Execute certification/pay application by signature of authorized officer.

C. Submit two copies of each Application for Payment to Construction Manager.

PART 4 CONTRACT MODIFICATION PROCEDURES

4.01 HRA WINTER WORK POLICY

A. The Housing and Redevelopment Authority of the City of St. Paul (HRA) recognizes that there are weather related exterior items that cannot be completed in winter conditions ("Weather Conditional Work"), including but not limited to:
   1. Exterior painting
   2. Sod
   3. Foundation plantings
   4. Rain garden installation
   5. Concrete sidewalks, steps, landings, curbs, garage slabs, and asphalt driveways

B. The HRA defines winter conditions as "temperatures consistently below a high of 50 degrees Fahrenheit". Winter conditions are typically in effect from November 15th through April 15th each year, although there is potential for an earlier or later start and end date depending on weather.

C. In the case of NSP homes where a notice to proceed is issued between October and February, the time parameter of winter conditions could mean that the entire timeline for construction completion (typically 90-120 days) is within winter conditions.

D. It is the responsibility of the contractor to communicate, to the Owner, the exterior line items in the scope of work that are Weather Conditional Work as a component of the timeline submission required prior to issuance of a notice to proceed.

E. Contractors are also responsible for ensuring that all Weather Conditional Work is completed within the manufacturers or industry standards recommended temperature range.

F. The Contractor is responsible for prioritizing Weather Related Work when winter conditions are not present, in order to complete the house within the construction timeline whenever possible.

G. The HRA's objective is to ensure that remodeling work on NSP projects is substantially complete within the timeline for construction completion (90-120 days) so that the project can be issued a certificate of occupancy and sold to a new homeowner; the contractor is responsible for ensuring that temporary, structurally sound solutions are implemented when Weather Related Work will effect the ability to secure a Certificate of Occupancy.

H. In the event that winter conditions are present throughout the 120 day construction contract period, the HRA will escrow 1 and 1/2 times the cost for Weather Conditional Work (150%), to be completed within 30 days of the end of winter conditions.

4.02 SUBSTITUTIONS

A. Changes in products, materials, equipment, and methods of construction required by the Contract Documents proposed by the General Contractor after award of the Contract are considered to be requests for substitutions.

B. Submit requests according to procedures required for change-order proposals.

C. Substitution requests shall include a complete list of changes or modifications needed in the Scope of Work in order to accommodate the proposed substitution.

D. Provide samples and product data, including drawings and descriptions of products as well as fabrication and installation procedures, where applicable or where requested by the Owner or Project Manager.

E. Indicate the substitution's effect on the Contractor's Construction Schedule, if any. Indicate cost information, including a proposal of the net change, if any, in the Contract Sum. Acceptance will be in the form of a written Change Order signed by the Owner and Project Manager.

PART 5 COMPLIANCE INFORMATION AND REQUIRMENTS

5.01 See HRA NSP website for compliance requirements.

A. http://www.stpaul.gov/nsp

B. Review the document labeled: *Section II - Compliance Information and Requirements.*
   1. It contains additional information on:
      a. Insurance
      b. B2Gnow/LCP Tracker, Contract Compliance Monitoring System
      c. Vendor Outreach Program
      d. Affirmative Action
      e. Sustainable Green Policy
      f. Section 3
      g. Two Bid Policy
      h. Limited English Policy
      i. Xcel Energy Participating Contractors' List
      j. Radon Mitigation Contractors' List

5.02 SECURITY PROCEDURES

A. General Contractor is responsible for maintaining security of the site, including:
   1. Locking buildings at the end of each work day;

2. Boarding window or door openings;
3. Installing security fencing;
4. Providing temporary barricades, bracing or railings;
5. And any other work or facilities necessary to maintain a safe and secure site, including compliance with all health, safety, building, and other codes and laws.

B. Any tools or materials or other property stored on the site prior to installation are the responsibility of the General Contractor and its Subcontractors are responsible for insuring their own such property against loss by theft or other cause.

5.03 JOB CONDITIONS

A. The General Contractor shall notify the Owner and Project Manager of repair not covered in the Scope of Work that is necessary for satisfactory completion of the Project.

B. Defects that become evident as work progresses shall be reported not concealed.

C. Ensure safe passage of all employees during the course of demolition or other persons as necessary by erecting barriers, bracing, or other temporary supports as required.

5.04 SAFETY AND CLEAN UP

A. The General Contractor must keep the site clean at all times during construction.

B. In no event can debris be stored outside overnight unless it is inside a dumpster.

C. All floors are to be picked up and kept broom clean at the end of the work day.

D. No combustible debris shall be thrown, stored, or burned on the property, adjacent parcels, sidewalks, streets, or alleys.

E. Debris created from work at the property must be disposed of immediately.

F. Any debris caused by the General Contractor or its Subcontractor shall be removed from the work area in the General Contractor's containers and disposed of off site by the General Contractor.

PART 6 SPECIAL PROCEDURES

6.01 ASBESTOS ABATEMENT,

A. If asbestos is found on this project follow the necessary requirements for proper abatement. A contractor must be licensed by the Minnesota Department of Health to perform asbestos-related work. Asbestos-related work includes the work area preparation, enclosure, removal, or encapsulation of asbestos-containing material.

6.02 LOW VOC, see section 01 6116

6.03 LEAD BASED PAINT

A. General Information
1. Projects funded in whole or in part with federal funds must comply with the "Regulation on Lead-Based Paint Hazards in Federally Owned Housing and Housing Receiving Federal Assistance".
2. Properties built after 1/1/78 and properties needing emergency rehab assistance are exempt from Lead-Based Paint Regulation requirements.
3. All projects receiving over $25,000 of HUD funds per unit for rehabilitation must abate all Lead-based paint hazards.

B. **Removal Procedures**
1. Risk Assessments:
   a. A Risk Assessment must be completed by a licensed Lad-Based Paint Risk Assessor on all properties built before 1/1/78 (excluding emergency rehab cases).
   b. The Owner or Project Manager arranges and pays for the Risk Assessment.
   c. The Risk Assessment report will summarize the nature and scope of known lead-based paint hazards.

C. Scope of Work: The Project Manager prepares the Scope of Work incorporating lead hazard reduction work based on the Risk Assessment report.

D. Licensed Lead Abatement Supervisor: Only General or Subcontractors who are State licensed Lead Abatement Supervisors are allowed to bid on projects involving lead hazard reduction work.

E. Project Plan: The General Contractor must prepare a written project plan and communicate it to the Owner and Project Manager. It shall include:
   1. Start-up date and how long the project is expected to last.
   2. Areas to be abated and precautions to take.
   3. A warning to pay attention to the caution signs that are posted by the General Contractor around the project site.
   4. Location of areas that may be restricted.

F. The selected General Contractor performs the work, using lead hazard control measures where indicated in the Scope of Work.

G. The General contractor will notify the Project Manager when work is complete.

H. A Clearance Test for lead-based paint dust is required upon completion of the Lead Based Paint Hazard Reduction Project Plan.
   1. The Clearance Test must be performed by a State licensed Clearance Examiner.
   2. It is the responsibility of the General Contractor to arrange and pay for any and all of the Clearance Tests that may be required. If the Clearance Test indicates lead levels lower than acceptable amounts, the General Contractor's lead reduction and control work is complete and the final construction payment application may be processed.
   3. If the Clearance Test is found to contain lead levels above an acceptable amount, the General Contractor must clean the work area again and request another Clearance Test at no additional cost to the Owner, until the Clearance Test is passed.
   4. The Final payment application will not be processed until all areas are determined to be free of hazardous lead levels.

I. Additional Information:
   1. General Contractor must obtain and review the following documents, which provide more detailed information on lead paint hazards and reduction and control measures:
      a. Minnesota Department of Lead program, "Safely Working with Lead While Remodeling the Older Home" pamphlet series. 1-651-215-0890.
         1) U.S. Environmental Protection Agency, "Renovate Right: Important Lead Hazard Information for Families, Child Care Providers, and Schools" 21 page booklet. <http://www.epa.gov/lead/pubs/rrpamph.pdf>
         2) U.S. Department of Housing and Urban Development, "Lead Paint Safety: A Field Guide for Painting, Home Maintenance, and Renovation Work:" English and Spanish versions available. <http://portal.hud.gov/hudportal/HUD?src=/program_offices/healthy_homes/healthyhomes/lead>
         3) U.S. Department of Housing and Urban Development, "Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing". October 1996. <http://portal.hud.gov/hudportal/HUD?src=/program_offices/healthy_homes/lbp/hudguidelines>
         4) U.S. Environmental Protection Agency, "Model Lead-Based Paint Abatement Worker Training Course." English and Spanish versions available. <http://www.epa.gov/lead/pubs/abateworker.htm>
         5) U.S. Environmental Protection Agency, "Lead Safety for Renovation, Repair, and Remodeling: Student Manual". <http://www.epa.gov/lead/pubs/rrp_8hr_studentmanual_feb09.pdf>

J. Abatement:
    1. Component Replacement: The removal of building components that contain lead-based paint. It is most appropriate for items such as doors, windows, trim, and cabinets.
    2. Paint Removal: The separation of paint from the substrate using safe heat, chemical, or abrasive methods. It may be done on- or off-site. Abrasive methods can create a great deal of dust, are the most hazardous, and require the greatest care and most thorough clean-up.
    3. Enclosure: The installation of a barrier (such as gypsum board or paneling) that is mechanically attached to the building component, with all edges and seams sealed to prevent escape of lead-based paint dust. It is most appropriate for large surfaces, such as walls, ceilings, floors, and exteriors.
    4. Encapsulation: The application of a liquid or adhesive material that covers the component and forms a barrier that makes the lead-based paint surface inaccessible by relying upon adhesion. It may be appropriate for many kinds of smooth surfaces but it cannot be used effectively on friction surfaces, surfaces in poor condition, or surfaces that may become wet. It also must be compatible with existing paint.
    5. Soil Removal: The removal of at least the top six inches of topsoil is adequate for most projects. In areas with heavy contamination, up to two feet may have to be removed, and must be disposed of using proper waste management techniques that comply with local requirements. The maximum lead concentration in replacement soil shall not exceed 200 ug/g. Sod or seeding of new soil should occur.
    6. Soil Cultivation: The mixing of low lead soil with high lead soil is an appropriate method if the average lead concentration of the soil to be abated is below 1,500 ug/g. Thorough mixing is required, and pilot testing of various techniques may be needed to ensure that thorough mixing does occur.
    7. Paving: The covering of highly contaminated soil with high quality concrete or asphalt. Paving is common in high traffic areas but not appropriate in play areas. The need for uncontaminated replacement soil is eliminated as is waste disposal costs. Paving often turns out to be the most economical recourse, despite its aesthetic disadvantages.

6.04 WASTE MANAGEMENT, see section 01 7419

PART 6 SUBMITTALS

7.01 GENERAL

A. Coordinate preparation and processing of submittals with performance of construction activities.

B. Transmit each submittal sufficiently in advance of performance of related construction activities to avoid delay.

C. Provide the following submittals required for performance of the Work, including the following:
    1. Administrative Submittals.
    2. Construction Schedule
    3. Samples/Product Data.

7.02 ADMINISTRATIVE SUBMITTALS

A. Provide as required in the Contract Documents. Such submittals include, but are not limited to, the following:
    1. Sworn Construction Statement
    2. Required permits.
    3. Applications for Payment.
    4. Insurance certificates.
    5. List of subcontractors.

7.03 CONSTRUCTION SCHEDULE

A. A construction schedule must be submitted to the Owner and Project Manager with the bid, unless requested otherwise in writing. Construction shall be completed within 120 days of notice to proceed.

7.04 SAMPLES/PRODUCT DATA:

A. Submit Samples as specified to be physically identical with the material or product proposed.

B. Samples include partial sections of manufactures or fabricated components, cuts or containers of materials, color range sets, and swatches showing color, texture, and pattern.

C. Provide product samples and/or product data for the following where included in the scope of work and for any other requirements mentioned in the specifications or drawings:
   1. Paint colors.
   2. Masonry and mortar color samples.
   3. Windows.
   4. Doors and hardware.
   5. Bathroom accessories.
   6. Kitchen cabinets.
   7. Plumbing fixtures.
   8. Lighting fixtures.
   9. Foundation waterproofing.
   10. Stair railings.
   11. Tile.
   12. Carpet.
   13. Interior trim samples.
   14. Exterior trim and siding samples.

END OF SECTION

SECTION 01 2000
PAYMENT PROCEDURES

PART 1 GENERAL

1.01 PAYMENT DOCUMENTS

A. All documents required to create a complete Payment Application can be downloaded from https://sites.google.com/site/nspconstructiondocs/

B. Payment Application form to be used: Application and Certificate for Payment provided by the HRA.
   1. Columns A, B, C should not change during the course of construction and should directly relate to the Sworn Construction Statement provided at the start of construction. As draws progress, columns D, E and F change to reflect work completed.

C. Additional Documents to be submitted with each pay application:
   1. Monthly Employment Utilization (MEU) Form
   2. Identification of Prime and Subcontractor Form
      a. An updated Sub ID sheet must be attached to help HR/EEO staff track subcontractor utilization.
   3. B2Gnow
      a. Ensure each subcontractor is logging into the B2Gnow system and logging payments received.

1.02 APPLICATIONS FOR PROGRESS PAYMENTS

A. Payment Period: Submit at intervals stipulated in the Agreement. The Owner will process the payment within 30 days.

B. Applications for payment must be signed by an authorized officer of the general construction firm

C. Use data from approved Sworn Construction Statement. Provide dollar value in each column for each line item for portion of work performed.

D. Submit one signed copy of the Application for Payment, complete with all required attachments, to the Construction Manager.

1.03 MODIFICATION PROCEDURES

A. For minor changes not involving an adjustment to the Contract Price or Contract Time, Construction Manager will issue instructions directly to Contractor.

B. Execution of Change Orders: Construction Manager will issue Change Orders for signatures of parties as provided in the Conditions of the Contract.

C. After execution of Change Order, promptly revise Application for Payment forms to record each authorized Change Order as a separate line item and adjust the Contract Price.
   1. Change orders shall be listed as lump sumps on the bottom of the pay application and refered to on the cover sheet.
   2. Include each line item of the change order as a separate line item in the pay application and the amount of the contractor adjustments.

1.04 APPLICATION FOR FINAL PAYMENT

A. Prepare Application for Final Payment as specified for progress payments, identifying total adjusted Contract Price, previous payments, and sum remaining due.

B. Additional documents:
   1. Final lien waivers from all subcontractors/material providers
   2. Monthly Employment Utilization (MEU) Form
   3. Project Employment Utilization (PEU) for City Funded Projects
   4. Lead Clearance
   5. NEC Certificate of Completion
   6. Waste Management Plan Report

SECTION 01 6000

PRODUCT REQUIREMENTS

PART 1 GENERAL

1.01 SUBMITTALS

A. Product Data Submittals: Submit manufacturer's standard published data. Mark each copy to identify applicable products, models, options, and other data. Supplement manufacturers' standard data to provide information specific to this Project.

PART 2 PRODUCTS

2.01 EXISTING PRODUCTS

A. Unforeseen historic items encountered remain the property of the Owner; notify Owner promptly upon discovery; protect, remove, handle, and store as directed by Owner.

2.02 NEW PRODUCTS

A. Provide new products unless specifically required or permitted by the Contract Documents.

2.03 PRODUCT OPTIONS

A. Products Specified by Reference Standards or by Description Only: Use any product meeting those standards or description.

PART 3 EXECUTION

3.01 SUBSTITUTION PROCEDURES

A. Instructions to Bidders specify time restrictions for submitting requests for substitutions during the bidding period. Comply with requirements specified in this section.

B. Document each request with complete data substantiating compliance of proposed substitution with Contract Documents.

C. A request for substitution constitutes a representation that the submitter:
   1. Has investigated proposed product and determined that it meets or exceeds the quality level of the specified product.
   2. Will provide the same warranty for the substitution as for the specified product.
   3. Will coordinate installation and make changes to other Work that may be required for the Work to be complete with no additional cost to Owner.
   4. Waives claims for additional costs or time extension that may subsequently become apparent.

D. Substitution Submittal Procedure:
   1. Submit two copies of request for substitution for consideration. Limit each request to one proposed substitution.
   2. Submit shop drawings, product data, and certified test results attesting to the proposed product equivalence. Burden of proof is on proposer.
   3. The Construction Manager will notify Contractor in writing of decision to accept or reject request.

END OF SECTION

SECTION 01 6116

VOLATILE ORGANIC COMPOUND (VOC) CONTENT RESTRICTIONS

PART 1 GENERAL

1.01 SUMMARY

A. Implement the following procedures in an effort to improve indoor air quality during Owner's occupancy.

B. Construction Indoor Air Quality (IAQ) Management
   1. Provide low-emitting products

1.02 DEFINITIONS

A. VOC-Restricted Products: All products of each of the following categories when installed or applied on-site in the building interior:
   1. Adhesives, sealants, and sealer coatings.
   2. Carpet.
   3. Carpet cushion.
   4. Resilient floor coverings.
   5. Wood flooring.
   6. Paints and coatings.
   7. Insulation.
   8. Gypsum board.
   9. Acoustical ceilings and panels.
   10. Cabinet work.
   11. Wall coverings.
   12. Composite wood and agrifiber products used either alone or as part of another product.
   13. Other products when specifically stated in the specifications.

B. Interior of Building: Anywhere inside the exterior weather barrier.

C. Adhesives: All gunnable, trowel able, liquid-applied, and aerosol adhesives, whether specified or not; including flooring adhesives, resilient base adhesives, and pipe jointing adhesives.

D. Sealants: All gunnable, trowelable, and liquid-applied joint sealants and sealant primers, whether specified or not; including fire stopping sealants and duct joint sealers.

PART 2 PRODUCTS

2.01 MATERIALS

A. All VOC-Restricted Products: Provide products having VOC content of types and volume not greater than those specified in State of California Department of Health Services Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers.
   1. Evidence of Compliance: Acceptable types of evidence are:
      a. Current GREENGUARD Children & Schools certification; www.greenguard.org.
      b. Current Carpet and Rug Institute Green Label Plus certification; www.carpet-rug.org.
      c. Current SCS Floorscore certification; www.scscertified.com.
      d. Current SCS Indoor Advantage Gold certification; www.scscertified.com.
      e. Product listing in the CHPS Low-Emitting Materials Product List at www.chps.net/manual/lem_table.htm.
      f. Current certification by any other agencies acceptable to CHPS.
      g. Report of laboratory testing performed in accordance with CHPS requirements for getting a product listed in the Low-Emitting Materials Product List; report must include laboratory's statement that the product meets the specified criteria.

B. Adhesives and Joint Sealants: Provide only products having volatile organic compound (VOC) content not greater than required by South Coast Air Quality Management District Rule No.1168.
   1. Evidence of Compliance: Acceptable types of evidence are:

a. Report of laboratory testing performed in accordance with requirements.
b. Published product data showing compliance with requirements.
c. Certification by manufacturer that product complies with requirements.

C. Aerosol Adhesives: Provide only products having volatile organic compound (VOC) content not greater than required by Green Seal GS-36.
1. Evidence of Compliance: Acceptable types of evidence are:
a. Current Green Seal Certification.

D. Paints and Coatings applied within building waterproof envelope:
1. Comply with VOC Content limits (as noted in Criterion 6.1) of Green Seal Standard GS-11 "Paints," First Edition; Standard GC-03 "Anti Corrosive Paints," and MPI GPS-2-8, as follows (in grams/Liter):
a. Flat: 50
b. Non-flat: 50
c. Anti-Corrosive and Anti Rust: 250
d. Floor Coatings: 100

E. Carpet and Adhesive: Provide products having VOC content not greater than that required for CRI Green Label Plus certification.
1. Evidence of Compliance: Acceptable types of evidence are:
a. Current Green Label plus Certification.
b. Report of laboratory testing performed in accordance with requirements.

F. Carpet, Carpet Cushion, and Adhesive: Provide products having VOC content as specified in Section 09 6800.

G. Carpet Cushion: Provide products having VOC content not greater than that required for CRI Green Label Plus certification.
1. Evidence of Compliance: Acceptable types of evidence are:
a. Current Green Label plus Certification.
b. Report of laboratory testing performed in accordance with requirements.

H. Composite Wood and Agrifiber Products and Adhesives Used for Laminating Them: Provide products having no added urea-formaldehyde resins.
1. Evidence of Compliance: Acceptable types of evidence are:
a. Current SCS "No Added Urea Formaldehyde" certification; www.scscertified.com.
b. Published product data showing compliance with requirements.
c. Certification by manufacturer that product complies with requirements.

I. Other Product Categories: Comply with limitations specified elsewhere.

PART 3 EXECUTION

3.01 GENERAL

A. Incorporate procedures and processes during construction and prior to occupancy as described herein

END OF SECTION

SECTION 01 7000

EXECUTION REQUIREMENTS

PART 1 GENERAL

1.01 PROJECT CONDITIONS

A. Grade site to drain. Maintain excavations free of water. Provide, operate, and maintain pumping equipment.

B. Ventilate enclosed areas to assist cure of materials, to dissipate humidity, and to prevent accumulation of dust, fumes, vapors, or gases.

C. Dust Control: Execute work by methods to minimize raising dust from construction operations. Provide positive means to prevent air-borne dust from dispersing into atmosphere and over adjacent property.

D. Erosion and Sediment Control: Plan and execute work by methods to control surface drainage from cuts and fills, from borrow and waste disposal areas. Prevent erosion and sedimentation.

E. Pest and Rodent Control: Provide methods, means, and facilities to prevent pests and insects from damaging the work.

F. Pollution Control: Provide methods, means, and facilities to prevent contamination of soil, water, and atmosphere from discharge of noxious, toxic substances, and pollutants produced by construction operations. Comply with federal, state, and local regulations.

PART 2 PRODUCTS

2.01 PATCHING MATERIALS

A. New Materials: As specified in product sections; match existing products and work for patching and extending work.

B. Type and Quality of Existing Products: Determine by inspecting and testing products where necessary, referring to existing work as a standard.

PART 3 EXECUTION

3.01 LAYING OUT THE WORK

A. Verify locations of survey control points prior to starting work.

B. Promptly notify Construction Manager of any discrepancies discovered.

C. Establish elevations, lines and levels. Locate and lay out by instrumentation and similar appropriate means:

3.02 GENERAL INSTALLATION REQUIREMENTS

A. Install products as specified in individual sections, in accordance with manufacturer's instructions and recommendations, and so as to avoid waste due to necessity for replacement.

B. Make vertical elements plumb and horizontal elements level, unless otherwise indicated.

C. Install equipment and fittings plumb and level, neatly aligned with adjacent vertical and horizontal lines, unless otherwise indicated.

D. Make consistent texture on surfaces, with seamless transitions, unless otherwise indicated.

E. Make neat transitions between different surfaces, maintaining texture and appearance.

3.03 CUTTING AND PATCHING

A. Whenever possible, execute the work by methods that avoid cutting or patching.

B. Perform whatever cutting and patching is necessary to:
   1. Complete the work.
   2. Fit products together to integrate with other work.
   3. Provide openings for penetration of mechanical, electrical, and other services.
   4. Match work that has been cut to adjacent work.

5. Repair areas adjacent to cuts to required condition.
6. Repair new work damaged by subsequent work.
7. Remove samples of installed work for testing when requested.
8. Remove and replace defective and non-conforming work.

C. Execute work by methods that avoid damage to other work and that will provide appropriate surfaces to receive patching and finishing. In existing work, minimize damage and restore to original condition.

D. Patching:
   1. Finish patched surfaces to match finish that existed prior to patching. On continuous surfaces, refinish to nearest intersection or natural break. For an assembly, refinish entire unit.

3.04 PROGRESS CLEANING

A. Maintain areas free of waste materials, debris, and rubbish. Maintain site in a clean and orderly condition.

3.05 PROTECTION OF INSTALLED WORK

A. Protect installed work from damage by construction operations.

B. Provide special protection where specified in individual specification sections.

C. Remove protective coverings when no longer needed; reuse or recycle plastic coverings if possible.

3.06 FINAL CLEANING

A. Use cleaning materials that are nonhazardous.

B. Clean interior and exterior glass, surfaces exposed to view; remove temporary labels, stains and foreign substances, polish transparent and glossy surfaces, vacuum carpeted and soft surfaces.

C. Remove all labels that are not permanent. Do not paint or otherwise cover fire test labels or nameplates on mechanical and electrical equipment.

D. Clean equipment and fixtures to a sanitary condition with cleaning materials appropriate to the surface and material being cleaned.

3.07 CLOSEOUT PROCEDURES

A. Make submittals that are required by governing or other authorities.

B. Review Section 01 7700 CLOSEOUT PROCEDURES AND SUBMITTALS.

C. Notify Construction Manager when work is considered ready for Substantial Completion.

D. Submit written certification that Contract Documents have been reviewed, work has been inspected, and that work is complete in accordance with Contract Documents and ready for Construction Manager's review.

E. Notify Construction Manager when work is considered finally complete.

F. Complete items of work determined by Construction Manager's final inspection.

END OF SECTION

SECTION 01 7419

CONSTRUCTION WASTE MANAGEMENT AND DISPOSAL

$_____

PART 1 GENERAL

1.01 WASTE MANAGEMENT REQUIREMENTS

A. Owner requires that this project generate the least amount of trash and waste possible.

B. Employ processes that ensure the generation of as little waste as possible due to error, poor planning, breakage, mishandling, contamination, or other factors.

C. HRA Policy for this project is dependent on diversion of 50 percent, by weight, of potential landfill trash/waste by recycling and/or salvage.

D. The following recycling incentive programs are mandatory for this project; Contractor is responsible for implementation:

1.02 SUBMITTALS

A. ACTION SUBMITALS

1. **CONSTRUCTION AND DEMOLITION WASTE MANAGEMENT(CWM) PLAN**
    a. Analysis of estimated job-site waste to be generated, including types and quantities of compostable, recyclable, and salvageable materials.
    b. Description of means and methods to achieve 50 percent diversion requirement for compostable, recyclable, and salvageable materials, including those that may be donated to charitable organizations.
    c. Identification of the carpet product's composition as polymer, nylon or polypropylene
    d. Identification of recycling contractors and haulers proposed for use in the project and locations accepting construction waste materials or entities providing related services.

B. FINAL WASTE MANAGMENT REPORT: General Contractor is responsible to submit at completion of construction and prior to contract close-out, in electronic format.

1. All information required in Waste Management Progress Reports
2. Legible copies of on-site logs, manifests, weight tickets, and receipts.
3. Final calculations, including total amount (by weight or volume) of diverted construction and demolition waste, and the total amount (by weight or volume) of landfilled waste.

PART 3 EXECUTION

2.01 WASTE MANAGEMENT PLAN IMPLEMENTATION

A. Manager: Designate an on-site person or persons responsible for instructing workers and overseeing and documenting results of the Waste Management Plan.

B. Communication: Distribute copies of the Waste Management Plan to job site foreman, each subcontractor and Construction Manager.

C. Facilities: Provide specific facilities for separation and storage of materials for recycling, salvage, reuse, return, and trash disposal, for use by all contractors and installers.

D. Hazardous Wastes: Separate, store, and dispose of hazardous wastes according to applicable regulations.

E. Recycling: Separate, store, protect, and handle at the site identified recyclable waste products in order to prevent contamination of materials and to maximize recyclability of identified materials. Arrange for timely pickups from the site or deliveries to recycling facility in order to prevent contamination of recyclable materials.

F. Reuse of Materials On-Site: Set aside, sort, and protect separated products in preparation for reuse.

G. Salvage: Set aside, sort, and protect products to be salvaged for reuse off-site.

SECTION 01 7700

CLOSEOUT PROCEDURES AND SUBMITTALS

PART 1 GENERAL

1.01 SUBMITTALS

A. All documents required to create a complete Final Payment Application can be downloaded from https://sites.google.com/site/nspconstructiondocs/

B. Notify Construction Manager when work is considered ready for Substantial Completion.
   1. Make sure the work is mostly complete and cleaned for inspection.

C. Substantial Completion Submittals:
   1. Project Record Documents: Submit documents listed below to Construction Manager:
      a. Final Pay Application
      b. Monthly Employment Utilization (MEU) Form
      c. Project Employment Utilization (PEU) for City Funded Projects
      d. Lead-based Paint Hazard Clearance Testing
      e. Energy Modeling/NEC Compliance Report
      f. Final Waste Management Report, see Section 01 7419 CONSTRUCTION WASTE MANAGEMENT AND DISPOSAL
      g. Permit Closeout/Code Compliance
      h. Winter Work/Weather Related Work Escrow
      i. Final Lien Waivers
      j. Material Allowance Reconciliation Change Order (if necessary).

D. Notify Construction Manager when work is considered finally completed. All Punch List items shall be completed and approved by Construction Manager and HRA Project Manager.

E. Final Completion Submittals:
   1. Project Record Documents: Submit documents listed below to Construction Manager:
      a. Building Maintenance Manual and Warranty documents for following:
         1) Appliance and building systems
            (a) HVAC equipment
            (b) Lighting equipment
            (c) Kitchen and Laundry Appliance Manuals
         2) Water-using equipment and controls installed:
            (a) Hot water delivery system(s)
            (b) Toilets
            (c) Faucets
            (d) Shower head(s)
            (e) Dishwasher
            (f) Clothes washer
      b. Signed Certificate of Substantial Completion
      c. Punch List Items Completed

PART 3 EXECUTION

2.01 LEAD-BASED PAINT HAZARD CLEARANCE TESTING

A. Where lead-based paint hazard control or reduction work has been performed by the General Contractor, the General Contractor will contact a certified third party Clearance Technician from Ramsey County Department of Public Health or other certified testing agency for clearance testing.

2.02 ENERGY MODELING (NEC)

A. Contractor must work with the Neighborhood Energy Connection (NEC) who will:
   1. Create an energy model with the building plans and specifications to show the building's projected energy performance in the design stages
   2. Conduct a mid-construction pre drywall thermal enclosure inspection

SECTION 01 8113

SUSTAINABLE DESIGN REQUIREMENTS

PART 1 GENERAL

1.01 ENERGY CONSERVATION

A. This property must go through Xcel Energy's Home Performance with Energy Star program.
   1. All insulation and HVAC work must be performed by Xcel Energy's approved contractor list.
   2. General Contractors that are on the Home Performance list may choose Subcontractors that are not on the list, but those General Contractors will be held responsible for all work completed.
   3. General Contractors will be responsible for submitting documentation required of the Home Performance with Energy Star program and will be responsible for achieving Energy Improvements outlined by Neighborhood Energy Connection.
   4. The "Specifications for Energy Improvement Upgrades" provided by the Neighborhood Energy Connection (See appendix) are a part of the Scope of Work for this property.
   5. Any discrepancies between the Scope of Work and NEC's specifications are to be clarified during the bid process.

B. Energy Efficient Lighting
   1. The Owner/Project Manager shall select specific locations of fixtures and switches in each area.
   2. All lighting fixtures will be purchased new, unless otherwise indicated.
   3. No plastic lighting fixtures are acceptable.
   4. No fluorescent tub light fixtures are acceptable in living spaces.
   5. Provide Energy Star certified CFL or LED light bulbs for all fixtures.
   6. All light fixtures are to have color corrected bulbs.
   7. Light bulbs that are viewable within fixtures will be a globe or candelabra style CFL.
   8. Provide and install lighting fixtures and switches.
   9. Review fixtures with Owner prior to installation.
   10. All electrical outlets and cover plates are to be replaced throughout the building.

C. Energy Efficient Appliances
   1. All appliances must be purchased new and be Energy Star certified or high efficiency models when Energy Star certification is not possible.
   2. High-efficiency appliances meet the following standards

1.02 QUALITY ASSURANCE

A. The Neighborhood Energy Connection (NEC), through its Peak Performance Homes custom consulting program, certifies independent consultants who provide developers with specific information about how to increase the energy efficiency of their buildings.

PART 2 PRODUCTS

2.01 LOW-EMITTING MATERIALS

A. Cabinet Materials: Low VOC
   1. Provide wood cabinets with self-closing hinges and adjustable shelves from the Schrock Select (available at Menards), Mid-Continent Cabinetry (available at All Inc.), or MINNCOR (available at MINNCOR) design lines or approved equal.
   2. Cabinets are to have plywood sides and bases.
   3. Drawer boxes shall be plywood with dovetail joinery.
   4. Cabinets to be constructed with maple; full overlay doors and flat or 5 pieces. Alternative styles may be approval by the HRA.

PART 3 EXECUTIONS

3.01 CONSTRUCTION WASTE MANAGEMENT

A. Comply with Construction Waste Management and Disposal Plan. Section 01 7419

3.02 CONSTRUCTION INDOOR-AIR-QUALITY MANAGEMENT

A. Change all air filters regularly during construction with filters specified for the specific furnace.
   1. Replace all air filters immediately prior to Substantial Completion with the specified permanent filters.

END OF SECTION

SECTION 02 4100

DEMOLITION

PART 1 GENERAL **$_____**

1.01 QUALITY ASSURANCE

A. Demolition Firm Qualifications: Company specializing in the type of work required.

PART 3 EXECUTION

2.01 GENERAL PROCEDURES AND PROJECT CONDITIONS

A. Comply with applicable codes and regulations for demolition operations and safety of adjacent structures and the public.
   1. Obtain required permits.
   2. Take precautions to prevent catastrophic or uncontrolled collapse of structures to be removed; do not allow worker or public access within range of potential collapse of unstable structures.
   3. Protect hardwood floors for possible refinishing later.
   4. Provide, erect, and maintain temporary barriers and security devices.

B. If hazardous materials are discovered during removal operations, stop work and notify Construction Manager and Owner; hazardous materials include regulated asbestos containing materials, lead, PCB's, and mercury.

C. Perform demolition in a manner that maximizes salvage and recycling of materials.
   1. Inform Project Manager of potential strategies to reuse construction material.
      a. Only move forward with reusing of construction materials with Project Manager's consent.

2.02 EXISTING UTILITIES

A. Coordinate work with utility companies; notify before starting work and comply with their requirements; obtain required permits.

B. Protect existing utilities to remain from damage.

2.03 SELECTIVE DEMOLITION FOR ALTERATIONS

A. Drawings showing existing construction and utilities are based on casual field observation and existing record documents only.

B. Remove existing work as indicated and as required to accomplish new work.

C. Services (Including but not limited to Site, Building Interior, Building Exterior, HVAC, Plumbing, and Electrical): Remove existing systems and equipment as indicated.

D. **Interior Demolition to Include:**
   1. SIDE & REAR PORCH REMOVAL: Remove floor system (wood or concrete), exterior walls, windows, doors, and ceiling covering to ceiling collars leaving only the original porch shed style roof system.
      Location: Exterior, Side & Rear Porch, per plans

   2. REMOVE EXTERIOR TRIM: Remove window, door trim, fascia and soffit that is damaged, rotted or deteriorated.
      Location: Exterior window/door trim. Also remove fascia and soffit ONLY if it is damaged, rotted, deteriorated, or missing.

   3. CARPET REMOVAL: Remove all carpeting throughout the dwelling. Include carpet tack strips, staples, and padding in removal.
      Location: Throughout the house

4. REMOVE CHAINLINK FENCING: Remove chain link fencing and posts set in concrete on the West property line of the lot.
   Location: Exterior, entire property

5. SIDING/ASBESTOS SIDING REMOVAL: Remove all asbestos siding & aluminum soffit, fascia, and window and door wraps from all existing exterior walls, dormers, and gable walls. Remove wood siding from all existing exterior walls, dormers, and gable walls.
   Location: Exterior, siding

6. UNDERLAYMENT REMOVAL: Remove luon plywood underlayment.
   Location: Throughout the house

7. CONCRETE PATIO & STOOP AND STEP REMOVAL: Remove the existing front porch concrete step and the rear entry stoop, steps, and patio.
   Location: Exterior, front, side, and rear entry locations

8. COUNTERTOP REMOVAL: Remove countertop from base cabinet
   Location: All kitchens, bathrooms, and any in the basement

9. CABINET, VANITY, AND SHELVING REMOVAL: Remove wood cabinets, shelving, and vanities from the house
   Location: Throughout the house

10. INTERIOR DOOR REMOVAL: Remove all interior doors, frames, jambs, and casings.
    Location: Throughout the house

11. COMPLETE INTERIOR WALL: Remove non-bearing wall and coverings, including studs and wall coverings both sides if present
    Location: See Proposed Plans-Walls to be demolished per plans

12. DRYWALL/PANEL TYPE CEILING REMOVAL: Remove drywall and or panel type ceilings, on the entire main level to the floor joists in order to bring the ceiling heights back to the original and for new ductwork, electrical, and plumbing to be run to the 2nd floor. Also, remove drywall and/or panel type ceiling coverings to the ceiling collars on the entire 2nd floor in order to bring the ceiling heights back to the original and for new ductwork, electrical, and plumbing to be run
    Location: Throughout the house

14. BASEMENT GUTTING: Remove all non-bearing framing members, drywall, cabinets, floor coverings, etc. All bearing posts and wood beams will need to be removed and replaced with steel posts & beams. Leave stairs, and 1st floor joists exterior foundation walls, concrete floor, electrical service, plumbing main, ECT.
    Location: Basement

15. OLD CONCRETE GARAGE SLAB/APRON REMOVAL: Remove existing concrete apron and garage slab remnants from the rear yard.

    Location: Exterior South side of existing garage

16. SIDEWALK REMOVAL: Break up concrete sidewalk with pneumatic tool and haul away.

    Location: Exterior, all existing sidewalks

17. VINYL FLOORING REMOVAL: Remove all vinyl type flooring, including underlayment in the house.
Location: Throughout the house

18. CHIMNEY REMOVAL: Tear out existing chimney from roof to basement footing,
Location: Chimney from roof to basement footing

19. ASPHALT OR FIBERGLASS SHINGLE REMOVAL: Remove all asphalt and/or wood Shingles, felt paper, vents, plumbing caps, and nails down to the roof decking.
Location: Exterior dwelling roof

20. COMPLETE INTERIOR WALL REMOVAL & INSTALL HEADER**:** Remove bearing wall and coverings, including studs and wall coverings both sides if present. Install a properly sized steel or wood header.
Location: See Proposed Plans-Walls to be demolished per plans

21. DRYWALL WALL COVERING REMOVAL: Remove drywall wall covering to the studs in order for new ductwork, electrical, and plumbing to be run in the kitchen, laundry and all bathrooms.
Location: Kitchen, all bathrooms locations, and main floor laundry location

22. MILLWORK REMOVAL: Remove all base, base shoe, casings, cased opening & window jambs in the house.
Location: Throughout the house

23. DUCTWORK REMOVAL: Demo existing ductwork to the 2nd floor and as needed throughout to comply with new floor plan layouts.
Location: Throughout the house. See plans.

24. PANELING REMOVAL: Remove all wall & ceiling paneling coverings.
Location: Throughout the house. See plans.

25. GUTTER & DOWNSPOUT REMOVAL: Removal all existing edge hung gutters and wall mounted downspouts from the exterior of the home.
Location: Exterior, gutters & downspouts

26. ROOF OVERHANG REMOVAL: Remove entire entry roof overhang system
Location: Exterior, left elevation Northeast entry door location that will be converted to a window opening

27. REAR ATTACHED STORAGE ADDITION REMOVAL: Completely remove the rear attached storage addition building from the rear of the dwelling. Include removal of the entire floor system, walls, windows, doors, and the entire roof structure.
Location: Exterior, rear (South) elevation

28. REMOVE SUSPENDED SLAB AND STEPS: Break up existing suspended slab and steps with pneumatic tool and haul away.
Location: Front & rear entry concrete stoops and steps

END OF SECTION

SECTION 02 8200

ASBESTOS REMEDIATION

PART 1 GENERAL **$_____**

1.01 DESCRIPTION OF WORK AND CONTRACTOR RESPONSIBILITIES

A. Provide all labor, equipment, material supervision and subcontracting for the removal and disposal of all Asbestos-Containing Material (ACM) as specified in the attached Asbestos Test.

B. When work areas include both friable and no friable types of ACM, Contractor's shall prepare work area using procedures for friable asbestos removal.

1.02 SUBMITTALS

A. Proof that the Contractor is qualified to perform Asbestos Remediation in the State of Minnesota.

B. Test Reports: Indicate Complete Remediation of Project.

PART 3 EXECUTION

2.01 LOCATIONS

A. Review the Asbestos report, included in this Manual, for locations.

B. Basement

C. Exterior Siding

END OF SECTION

SECTION 02 8313

LEAD HAZARD CONTROL ACTIVITIES

PART 1 GENERAL **$_____**

1.01 GENERAL INFORMATION

A. Projects funded in whole or in part with federal funds must comply with the "Regulation on Lead-Based Paint Hazards in Federally Owned Housing and Housing Receiving Federal Assistance." As a component of **Title X, Sections 1012 and 1013**, rehabilitation projects receiving more than $25,000 of federal funds must abate all lead.

B. Properties built after 1/1/78 and properties needing emergency rehab assistance are exempt from Lead-Based Paint Regulations.

1.02 PRICE AND PAYMENT PROCEDURES

A. Provide a price for the appropriate methods of abatement required by this scope of work.

1.03 SUBMITTALS

A. Project Plan: The General Contractor must prepare a written project plan and communicate it to the Construction Manager and Project Manager. It shall include:
   1. Start-up date and how long the project is expected to last.
   2. Areas to be abated and precautions to take.
   3. A warning to pay attention to the caution signs that are posted by the General Contractor around the project site.
   4. Location of areas that may be restricted.

B. Test Reports: Indicate Lead Based Paint Clearance.
   1. Submitted at final draw

1.04 QUALITY ASSURANCE

A. Licensed Lead Abatement Supervisor: Only General or Subcontractors who are State licensed to conduct lead hazard reduction work are allowed to bid on projects involving lead hazard reduction work. See Minnesota Statutes 144.9501-144.9512 and Minnesota Rules 4761.2000-4761.2700 for applicable safety precautions, disposal regulations, and other compliance regulations that apply to abatement activities.

B. Per MN Statute, Contractors must provide a 5 day notification to the Minnesota Department of Health prior to beginning lead abatement activities. During lead abatement, a MN Licensed Lead Abatement Supervisor must be on site and workers conducting lead abatement must be MN Licensed Lead Abatement Workers. See the MDH website for additional information:

http://www.health.state.mn.us/divs/eh/lead/prof/notification.html

PART 3 EXECUTION

2.01 ABATEMENT

A. When the Risk Assessment process determines that a Project contains a lead-based paint hazard, the General Contractor shall comply with the abatement measures defined by HUD in 24 CFR Part 35 Subpart A through R 35.1325

http://portal.hud.gov/hudportal/HUD?src=/program_offices/healthy_homes/enforcement/lshr

and by the EPA in 40 CFR 745.227(e).

http://www.gpo.gov/fdsys/pkg/CFR-2011-title40-vol31/pdf/CFR-2011-title40-vol31-sec745-227.pdf

and lead hazard reduction methods defined in Minnesota Statutes 144.9501-144.9512 and Minnesota Rules 4761.2000-4761.2700

http://www.health.state.mn.us/divs/eh/lead/rule.html

1. Component Replacement: The removal of building components that contain lead-based paint. It is most appropriate for items such as doors, windows, trim, and cabinets.
2. Paint Removal: The separation of paint from the substrate using safe heat, chemical, or abrasive methods. It may be done on- or off-site. Abrasive methods can create a great deal of dust, are the most hazardous, and require the greatest care and most thorough clean-up.
3. Enclosure: The installation of a barrier (such as gypsum board or paneling) that is mechanically attached to the building component, with all edges and seams sealed to prevent escape of lead-based paint dust. It is most appropriate for large surfaces, such as walls, ceilings, floors, and exteriors.
4. Encapsulation: The application of a liquid or adhesive material that covers the component and forms a barrier that makes the lead-based paint surface inaccessible by relying upon adhesion. It may be appropriate for many kinds of smooth surfaces but it cannot be used effectively on friction surfaces, surfaces in poor condition, or surfaces that may become wet. It also must be compatible with existing paint.
5. Soil Removal: The removal of at least the top six inches of topsoil is adequate for most projects. In areas with heavy contamination, up to two feet may have to be removed, and must be disposed of using proper waste management techniques that comply with local requirements. The maximum lead concentration in replacement soil shall not exceed 200 ug/g. Sod or seeding of new soil should occur.
6. Soil Cultivation: The mixing of low lead soil with high lead soil is an appropriate method if the average lead concentration of the soil to be abated is below 1,500 ug/g. Thorough mixing is required, and pilot testing of various techniques may be needed to ensure that thorough mixing does occur.
7. Paving: The covering of highly contaminated soil with high quality concrete or asphalt. Paving is common in high traffic areas but not appropriate in play areas. The need for uncontaminated replacement soil is eliminated as is waste disposal costs. Paving often turns out to be the most economical recourse, despite its aesthetic disadvantages.

2.02 LEAD-BASED PAINT HAZARD CLEARANCE TESTING

A. Where lead-based paint hazard control or reduction work has been performed by the General Contractor, the General Contractor will contact a certified third party risk assessor from Ramsey County Department of Public Health or other certified testing agency for clearance testing.

B. The Clearance Technician will conduct a visual assessment of completed work, take dust samples, have dust samples analyzed, and prepare a Clearance Report.

C. If sample results fail, Minnesota rules 4761.2670 subpart 2 and subpart 3 must be repeated. If test results of samples fail to meet clearance standards, surfaces must be retreated or recleaned at no additional cost to the Owner until clearance standard is met.

D. When the Clearance Report indicates that clearance standards have been met, and all other requirements of this section have been met, the Construction Manager and Owner will approve the final pay application.

2.03 LOCATIONS

A. Review Lead Report, attached in this Manual. Contractor is responsible for ensuring treatments meet abatement requirements as defined in federal and state statute.

END OF SECTION

SECTION 03 3000
CAST-IN-PLACE CONCRETE

PART 1 GENERAL **$_____**

1.01 QUALITY ASSURANCE

A. Perform work of this section in accordance with ACI 301 and ACI 318.

PART 2 PRODUCTS

2.01 FORMWORK

A. Formwork Design and Construction: Comply with guidelines of ACI 347 to provide formwork that will produce concrete complying with tolerances of ACI 117.

B. Form Materials: Contractor's choice of standard products with sufficient strength to withstand hydrostatic head without distortion in excess of permitted tolerances.
   1. Form Ties: Cone snap type that will leave no metal within 1-1/2 inches (38 mm) of concrete surface.

2.02 REINFORCEMENT

A. Reinforcing Steel: ASTM A615/A615M Grade 40 (280).

2.03 CONCRETE MATERIALS

A. Cement: ASTM C150, Type I - Normal Portland type.

2.04 CONCRETE MIX DESIGN

A. Normal Weight Concrete:
   1. Compressive Strength, when tested in accordance with ASTM C39/C39M at 28 days: 3,000 psi (20.7 MPa).

PART 3 EXECUTION

3.01 PREPARATION

A. Formwork: Comply with requirements of ACI 301. Design and fabricate forms to support all applied loads until concrete is cured, and for easy removal without damage to concrete.

B. Where new concrete is to be bonded to previously placed concrete, prepare existing surface by cleaning with steel brush and applying bonding agent in accordance with manufacturer's instructions.

3.02 INSTALLING REINFORCEMENT AND OTHER EMBEDDED ITEMS

A. Comply with requirements of ACI 301. Clean reinforcement of loose rust and mill scale, and accurately position, support, and secure in place to achieve not less than minimum concrete coverage required for protection.

3.03 PLACING CONCRETE

A. Place concrete in accordance with ACI 304R.

3.04 FLOOR FLATNESS AND LEVELNESS TOLERANCES

A. Maximum Variation of Surface Flatness:
   1. Exposed Concrete Floors: 1/4 inch (6 mm) in 10 Ft. (3 m).

B. Correct the slab surface if tolerances are less than specified.

C. Correct defects by grinding or by removal and replacement of the defective work. Areas requiring corrective work will be identified. Re-measure corrected areas by the same process.

3.05 CONCRETE FINISHING

A. CONCRETE APRON: Fill with up to 4” gravel, form with 4” lumber, place #10 WWM and expansion joints, pour and finish driveway apron.

Location: Exterior, front of garage

B. MONOLITHIC FOOTINGS AND SLAB (SINGLE POUR): Dig, form, place reinforcement, 4" gravel fill, 6 x 6 #10 woven wire mesh. Pour and finish concrete, Bottom of slab footing 12", top of footing below slab 12" wide, Slab thickness 4", 1/2" steel bars drilled into existing building, two 1/2" continuous steel bars in footing. 22’ W x 22’ D.

Location: Exterior, garage slab

C. PARTITION BLOCK: Install one course of 6” partition block on existing monolithic footing with ½” anchor bolts 12” from each end and every 6’ after. Core fill around bolts.

Location: Exterior garage slab

D. INTERIOR DRAIN TILE: Break-up concrete slab out 1 foot from exterior block wall in the existing full basement portion of the house. Install an interior drain tile system around foundation perimeter. Patch concrete slab in the existing full basement portion of the house and pour new slab over excavated crawl space portion of the house.

Location: Entire basement perimeter

E. SIDEWALK, CONCRETE INSTALL: Install 4” gravel, 4” concrete, leveling, forming, pouring, and finishing, remove forms.

Location: Exterior, front yard from street curb to front entry step, and from the front entry step, along the East side of the house, back the new garage service door location. See Landscape Plan.

F. SLAB AND STEP(S) ON GRADE: Build a concrete slab and step(s) on grade to match the same size as the existing. Build forms for slab and step(s), place rubble or forms in center, place steel, pour concrete slab and step(s), strip and clean forms, finish concrete, steps: 6”-7”. risers, 12” treads

Location: Front porch entry concrete stoop

G. Repair surface defects, including tie holes, immediately after removing formwork.

H. Concrete Slabs: Finish to requirements of ACI 302.1R, and as follows:

1. "Wood float" as described in ACI 302.1R; Garage Floor/Apron.
2. "Steel trowel" as described in ACI 301.1R; Basement Floor.

I. PIER FOOTINGS: Dig out and pour properly sized concrete pier footings for new basement center support steel pipe columns and beam. Backfill after pier footing is poured and repair existing concrete basement floor as needed.

Location: Basement

J. BASEMENT CELLAR FLOOR SLAB: Insure basement cellar floor slab is even, is cleanable, and all holes are filled.

Location: Basement

K. ROUND PIER PORCH FOOTINGS: Dig, pour, and then backfill round pier exterior footings for the front porch. Ensure the footings are at least 48” deep belled out to 18” at the base and are poured in a 12” round sonatube.
Location: Front & Rear Porch

3.06 CURING AND PROTECTION

A. Comply with requirements of ACI 308R. Immediately after placement, protect concrete from premature drying, excessively hot or cold temperatures, and mechanical injury.

END OF SECTION

Section 040100
MAINTENANCE OF MASONRY

PART 1 GENERAL **$_____**

1.01 FIELD CONDITIONS

A. Cold and Hot Weather Requirements: Comply with requirements of ACI 530/530.1/ERTA or applicable building code, whichever is more stringent.

PART 3 EXECUTION

2.01 REBUILDING

A. REPOINT BRICK WALL: Cut joints in existing brick wall and re-point; Re-point with Type N mortar or less.

Location: Interior and exterior foundation walls as needed

B. Cut out damaged and deteriorated masonry with care in a manner to prevent damage to any adjacent remaining materials.

2.02 REPOINTING

A. Cut out loose or disintegrated mortar in joints to minimum 1/2 inch (6 mm) depth or until sound mortar is reached.

B. Pre-moisten joint and apply mortar. Pack tightly in maximum 1/4 inch (6 mm) layers. Form a smooth, compact concave joint to match existing.

2.03 CLEANING NEW MASONRY

A. Verify mortar is fully set and cured.

B. Clean surfaces and remove large particles with wood scrapers, brass or nylon wire brushes.

END OF SECTION

SECTION 04 2300
GLASS UNIT MASONRY

PART 1 GENERAL **$_____**

1.01 FIELD CONDITIONS

A. Cold and Hot Weather Requirements: Comply with requirements of ACI 530/530.1/ERTA or applicable building code, whichever is more stringent.

PART 2 PRODUCTS

2.01 GLASS UNITS

A. Hollow Glass Units: Permanently seal hollow unit by heat fusing joint; with joint key to assist mortar bond.

2.02 MORTAR MIXING

A. Thoroughly mix mortar ingredients in accordance with ASTM C270 in quantities needed for immediate use.

PART 3 EXECUTION

3.01 INSTALLATION

A. Erect glass units and accessories in accordance with manufacturer's instructions.

B. Glass Block Windows-Venting: Install pre manufactured glass block windows with operable center vent and insect screen. Size of windows to be the maximum size of the existing masonry opening. Glass block window should be sealed on the interior & exterior perimeter in order to prevent air/moisture infiltration.

3.02 LOCATIONS

A. Basement windows; replace All.

END OF SECTION

SECTION 06 1000

ROUGH CARPENTRY

PART 1 GENERAL **$_____**

1.01 SUBMITTALS

PART 2 PRODUCTS

2.01 GENERAL REQUIREMENTS

A. Dimension Lumber: Comply with PS 20 and requirements of specified grading agencies.
   1. If no species is specified, provide any species graded by the agency specified; if no grading agency is specified, provide lumber graded by any grading agency meeting the specified requirements.
   2. Grading Agency: Any grading agency whose rules are approved by the Board of Review, American Lumber Standard Committee (www.alsc.org) and who provides grading service for the species and grade specified; provide lumber stamped with grade mark unless otherwise indicated.
   3. Lumber of other species or grades is acceptable provided structural and appearance characteristics are equivalent to or better than products specified.

B. Lumber fabricated from old growth timber is not permitted.

C. Provide wood harvested within a 500 mile (805 km) radius of the project site; see Section 01 6000 for requirements for locally-sourced products.

D. Lumber salvaged from deconstruction or demolition of existing buildings or structures is permitted in lieu of sustainably harvested lumber provided it is clean, denailed, and free of paint and finish materials, and other contamination; identify source; see Section 01 6000 for requirements for reused products.

E. Lumber fabricated from recovered timber (abandoned in transit) is permitted in lieu of sustainably harvested lumber, unless otherwise noted, provided it meets the specified requirements for new lumber and is free of contamination; identify source.

2.02 DIMENSION LUMBER FOR CONCEALED APPLICATIONS

A. Sizes: Nominal sizes.

B. Moisture Content: S-dry or MC19.

C. Stud Framing (2 by 2 through 2 by 6 (50 by 50 mm through 50 by 150 mm)):
   1. Grade: No. 2.

D. Joist, Rafter, and Small Beam Framing (2 by 6 through 4 by 16 (50 by 150 mm through 100 by 400 mm)):

E. Miscellaneous Framing, Blocking, Nailers, Grounds, and Furring:
   1. Lumber: S4S, No. 2 or Standard Grade.
   2. Boards: Standard or No. 3.

2.03 ACCESSORIES

A. Fasteners and Anchors:
   1. Metal and Finish: Hot-dipped galvanized steel per ASTM A153/A153M for high humidity and preservative-treated wood locations, unfinished steel elsewhere.
   2. Drywall Screws: Bugle head, hardened steel, power driven type, length three times thickness of sheathing.

B. Joist Hangers: Hot dipped galvanized steel, sized to suit framing conditions.
   1. For contact with preservative treated wood in exposed locations, provide minimum G185 (Z550) galvanizing per ASTM A653/A653M.

C. Building Paper: Water-resistant Kraft paper.

2.04 FACTORY WOOD TREATMENT

A. Treated Lumber and Plywood: Comply with requirements of AWPA U1 - Use Category System for wood treatments determined by use categories, expected service conditions, and specific applications.
   1. Preservative-Treated Wood: Provide lumber and plywood marked or stamped by an ALSC-accredited testing agency, certifying level and type of treatment in accordance with AWPA standards.

PART 3 EXECUTION

3.01 INSTALLATION - GENERAL

A. Select material sizes to minimize waste.

B. Where treated wood is used on interior, provide temporary ventilation during and immediately after installation sufficient to remove indoor air contaminants.

3.02 FRAMING INSTALLATION

A. Set structural members level, plumb, and true to line. Discard pieces with defects that would lower required strength or result in unacceptable appearance of exposed members.

B. Install structural members full length without splices unless otherwise specifically detailed.

C. Comply with member sizes, spacing, and configurations indicated, and fastener size and spacing indicated, but not less than required by applicable codes and AFPA Wood Frame Construction Manual.

D. Install horizontal spanning members with crown edge up and not less than 1-1/2 inches (38 mm) of bearing at each end.

E. 2" X 4" WOOD STUDS EXTERIOR: Frame bearing wall, exterior: green treated sole plate with sill seal foam, two 2" x 4" top plate. Include headers for doors and window. Studs at 16" O.C. **NOTE: The framing materials for this item HAVE been pre-purchased by the HRA. Please include any additional materials and all labor necessary to complete this item.**

   Location: Garage, See proposed plans

F. GARAGE SHEATHING: Install ½" OSB sheathing on new framed walls, gables, and roof with steel plywood clips. **NOTE: The sheathing materials for this item HAVE been pre-purchased by the HRA. Please include any additional materials and all labor necessary to complete this item.**

   Location: Garage, See proposed plans

G. INSTALL SUBFLOOR: Install Plywood CDX, glued and nailed to joists, T & G ¾" sub floor.

   Location: 1st & 2nd floors where masonry chimney is to be removed & where interior walls are to be removed.

H. DWELLING SHEATHING: Install 3/4" OSB sheathing over new framing for window or door addition or subtraction locations and roof location where chimney is to be removed.

   Location: Throughout the dwelling. Dining room North exterior wall, Kitchen West exterior wall, Existing 1st floor pantry East exterior wall, Existing 2nd floor porch East & South exterior walls, and existing 2nd floor bathroom East exterior wall. See plans.

I. TRUSS ROOF: Gable roof trusses, shop built by others and delivered to job, placed by hand, tie down straps, includes 2 gable ends 24" OC. **NOTE: The truss materials for this item HAVE been pre-purchased by the HRA. Please include any additional materials and all labor necessary to complete this item.**

Location: Garage roof

J. DECK/PORCH FLOOR FRAMING: Install 6" x 6" galvanized metal post anchors anchored to the round pier concrete footings with concrete wedge anchor bolts. Install treated lumber 6" x 6" posts in post anchors and mechanically fastened to beam. Install properly sized, treated, lumber, floor joists and ledger. Include lag bolts to code for the ledger, ledger flashing, joist hangers, and all required treated and galvanized fasteners. See Plans.

Location: Exterior, rear porch

K. WOOD BEAM OR HEADER: Install solid, properly sized, wood header, on new 5" turned colonial wood columns, with construction grade pine. Also install a properly sized, treated lumber, doubled at the front and both sides wood beam for the rear porch floor.

Location: Exterior, front porch and rear porch

L. DECK SURFACE: Install Douglas Fir, tongue & groove porch floor decking on the porch floor. Deck laid right angles to joists; 1/8" gap, installed with approved fasteners, and sealed 2 coats of approved weather-proof sealer prior to installation. See Plans.

Location: Exterior, rear porch

M. CEDAR BAND: Install rear porch floor perimeter cedar and porch header trim on all three sides of new porch roof beam or header. See Plans.

Location: Exterior, front porch and rear deck

N. POSTS AND COLUMNS: Install HBG Permacast tapered (8" at the base of the column tapering to 6" at the top of the column) fiberglass round colonial portico column with base and capitols on the interior of the home on the main level. Install 5" x 5" turned colonial wood porch posts on the front porch and rear porch.

Location: Interior – Main Level. Exterior – Front porch & rear porch. See plans.

O. 2" X 4" WOOD STUDS INTERIOR: Bearing or non- bearing wall: Sole plate, one cap, framing for interior doors, closets, and corners; 16" OC, 2" x 4" framed non-bearing wall

Location: See plans for new interior wall locations

P. LAMINATED VENEER LUMBER WOOD BEAM: Install properly sized laminated veneer lumber wood build-up beam on supports.

Location: 1st floor dining room. See plans.

Q. RISER BACKERS: Install ½" OSB stair riser backers on the basement staircase prior to the carpeting being installed.

Location: Basement Staircase

R. STAIR STRAPS: Install 18" metal stair straps fastened to the basement stair stringers and then to the landing for structural stability.

Location: Basement stair stringers

S. PIPE COLUMN: Install a 3" x 8" pipe column, including galvanized plates. Secure to concrete pier footing by drilling hole into pier footing and securing a post anchor with a ½" expansion type sleeve anchor bolt. Secure to secure beam with properly sized bolts.

Location: Basement on new concrete pier footings

T. STEEL BEAM: Install a properly sized steel beam on steel pipe column supports, including bearing plates.

Location: Basement, all main bearing support beams

U. PORCH CEILING: Install an oak beaded ceiling, center beaded one side and center V-joint other side 5/8" x 1 1/2" porch ceiling.

Location: Exterior, front & rear porch

V. PRIVACY FENCE: Install a 5', pre-fabricated lattice top panel, cedar privacy fence. Fence is to be placed in the locations shown on the landscape plan. Dig post holes 24" deep, 8' on center. Set cedar 4' x 4' posts in concrete and backfill holes. Install pre-fabricated panels on the posts.

Location: Exterior West property line

W. ATTIC SCUTTLE: Cut in and frame a 22" W x 30" L attic scuttle hole to access the peak attic.

Location: 2nd floor & attic

X. MAIN FLOOR JOIST REPAIR/REPLACE: Replace or sister dry rot or cut off floor joists.

Support over spanned floor joists as needed.

Location: Basement, throughout

Y. FIRE BLOCK: Provide fire block construction as necessary and seal chases in the basement ceiling. Use materials such as mineral wool in order to seal off all chases and penetrations through the basement ceiling or all wall top & bottom plate penetrations that are opened up during construction.

Location: Basement and throughout the dwelling

END OF SECTION

SECTION 06 2000

FINISH CARPENTRY

PART 1 GENERAL **$_____**

1.01 RELATED SECTIONS

A. See Section 09 9000 Painting and Coating, for trim finish and color.

PART 2 PRODUCTS

2.01 FINISH CARPENTRY ITEMS

A. Quality Grade: Unless otherwise indicated provide products of quality specified by AWI//AWMAC/WI Architectural Woodwork Standards for Premium Grade.

2.02 WOOD-BASED COMPONENTS

A. Wood fabricated from old growth timber is not permitted.

B. Provide sustainably harvested wood, certified or labeled as specified in Section 01 6000.

C. Provide wood harvested within a 500 mile (805 km) radius of the project site.

2.04 FABRICATION

A. Shop assembles work for delivery to site, permitting passage through building openings.

2.05 SHOP FINISHING

A. Sand work smooth and set exposed nails and screws.

B. Apply wood filler in exposed nail and screw indentations.

C. Finish work in accordance with AWI/AWMAC/WI Architectural Woodwork Standards, Section 5 - Finishing for Grade specified and as follows:

PART 3 EXECUTION

3.01 INSTALLATION

A. Install work in accordance with AWI/AWMAC/WI Architectural Woodwork Standards requirements for grade indicated.

B. Set and secure materials and components in place, plumb and level.

C. Use finish nails of sufficient length to penetrate framing 1".

D. Miter all lap joints, and break all lap joints over framing.

E. Carefully scribe work abutting other components, with maximum gaps of 1/32 inch (1 mm). Do not use additional overlay trim to conceal larger gaps.

F. TRIM EXISTING DOOR OPENING: Install casing on one side only on an exterior door trim. Casing to be 3 ¼" Princeton pre-painted MDF casing.

Location: Exterior doors

G. WOOD HANDRAIL: Install an oak graspable "bread loaf" shaped handrail on standard hardware, spaced no more than 6' apart, at a height of 34" – 38" off of the stair tread to meet code. Install returns back to the wall on all handrails.

Location: All interior stairways

H. BASE: Replace all base trim throughout the house. Base trim to be 5 ¼" colonial style pre-painted MDF base trim.

Location: Throughout the dwelling

I. PRE-HUNG DOOR: Install an Interior 1-3/8", 3-panel, hollow core door, 2 sides casing, and privacy lock handle for bedrooms and bathrooms and a passage handle for hallways and closets. Door unit to be pre-finished white from manufacturer. Handles to be egg shaped satin nickel door knobs.

Location: All interior doors throughout the dwelling. See Plans.

J. DOUBLE FRENCH DOOR: Install an interior 1- 3/8", 15-lite, double French door with 2 sides casing, and passage handles. Door unit to be pre-finished white from manufacturer. Handles to be egg shaped satin nickel door knobs.

Location: Master bedroom to sitting area/master closet

K. CROWN MOLDING: Install 5 ¼" pre-painted MDF ceiling crown molding

Location: Main floor front entry, living room and dining room.

L. CASING: Install casing trim on all window and door locations throughout the house. Casing to be 3 ¼" Princeton pre-painted MDF casing.

Location: Throughout the dwelling

M. BASE SHOE: Install ½" x ¾" base shoe on all base, where tile flooring is used.

Location: Both bathrooms, kitchen, 1st floor laundry room, front entry, and rear entry.

N. WINDOW/DOOR EXTENSION JAMBS & COLONIAL WINDOW STOPS: Provide & install quality pine pre-painted window extension jambs as needed and colonial style window stops on all window/door locations throughout the house.

Location: Throughout the dwelling. See plans for window & door locations.

END OF SECTION

SECTION 07 2126

BLOWN INSULATION

PART 1 GENERAL **$_____**

PART 2 PRODUCTS

2.01 MATERIALS

A. Loose Fill Insulation: ASTM C739, cellulose fiber type, nodulated for pour and bulk for pneumatic placement.
   1. R-Value: Attic R-50

B. Dense Pack Insulation: Fill Insulation: ASTM C739, cellulose fiber type, nodulated for pours and bulk for pneumatic placement.
   1. R-Value: 19 if possible
   2. Density: 3.5 Lbs. per Cubic Foot for the entire cavity

C. Ventilation Baffles: Formed plastic.

PART 3 EXECUTION

3.01 INSTALLATION-PLEASE REFER TO NEC SPEACIFICATIONS

1. OPEN ATTIC INSULATION: Blow in cellulose insulation to R-50.

   Location: Attic

2. INSULATE 2ND FLOOR CANTILEVER: Dense pack insulate the cantilever floor cavities to capacity with cellulose insulation.

   Location: 1st & 2nd floor bays.

3. ATTIC HATCH DOOR: Attic access panel shall be insulated to R-44 and an insulation dam shall be constructed around the opening. Opening shall be weather stripped to provide for a tight seal.

   Location: Attic.

4. FIBERGLASS BATT INSULATION: Install fiberglass batt insulation between all exterior wall stud cavities or, ceiling collar cavities that are opened during the demolition phase of construction, or new exterior framed walls portions for a window or door size modification. The General Contractor is required to call the NEC for inspection prior to installing drywall.

   Location: Throughout the dwelling.

A. Install insulation and ventilation baffle in accordance with ASTM C1015 and manufacturer's instructions.

B. Drill 2 inch (50 mm) diameter insulation access ports in fascia boards to permit equipment access.

C. Place insulation pneumatically to completely fill stud, joist, and rafter spaces.

D. Pour insulation to completely fill stud, joist, and rafter spaces to a density of 3.5 lbs. per cubic foot per cavity.

E. Completely fill intended spaces. Leave no gaps or voids.

F. Carefully seal all drilled holes with wood or foam plugs and patch all holes to match surrounding materials if the surface is exposed.

G. In balloon framed houses insures that blown cellulose is blocked from entering floor cavities such as second floor flooring.

END OF SECTION

SECTION 07 2500

WEATHER BARRIERS

PART 1 GENERAL **$_____**

1.01 UNIT PRICES

A. Tyvek material HAS NOT been pre-purchased by the HRA for this project. Delivery of all material to the job site shall be included in bid price. Contractor is responsible for contacting specified vendor to arrange for and take delivery. Provide a bid price for the house wrap, labor and additional materials required to perform work to code.

PART 2 PRODUCTS

2.01 WEATHER BARRIER ASSEMBLIES

A. Weather Barrier Membrane: Spun bonded polyolefin, non-woven, non-perforated, weather barrier
   1. Manufacturer: DuPont Tyvek Home Wrap or like product to be approved by owner.

B. Seam Tape: DuPont Tyvek or like product

C. Flashing: DuPont Tyvek or like product

D. Fasteners: DuPont Tyvek or like product

E. Interior Vapor Retarder: 6 Mil heavy plastic (polyethylene) sheeting
   1. On inside face of masonry and concrete walls use vapor retarder sheet, self-adhesive type,
      a. Install to cover ground in crawl space and 6" up foundation walls
      b. Overlap seams by 2' and secure with Tyvek tape.

PART 3 EXECUTION

3.01 INSTALLATION-REFER TO NEC SPECIFICATIONS-

A. Install materials in accordance with manufacturer's instructions.

B. Air Barriers: Install continuous air tight barrier over surfaces indicated, with sealed seams and with sealed joints to adjacent surfaces.

C. Install weather barrier over exterior face of exterior wall substrate in accordance with manufacturer’s recommendations.

D. Attach weather barrier to studs through exterior sheathing. Secure using weather barrier manufacturers recommended fasteners, spaced 12-18 inches vertically on center along stud line, and 24 inches on center, maximum horizontally.

E. HOUSE WRAP: Install Green Guard house wrap on exterior walls and gables prior to siding.

Location: Exterior, siding house and new garage. See Plans.

END OF SECTION

SECTION 07 2700

AIR BARRIER SYSTEM (SEALING OF BYPASSES)

PART 1 GENERAL **$_____**

1.01 QUALITY ASSURANCE

A. Designer Qualifications: Perform design under direct supervision of a Professional Engineer experienced in design of this type of work and licensed in Minnesota.

PART 2 PRODUCTS

2.01 ADHESIVES AND SEALANTS

A. VOC content not to exceed the following [g/L; less water and less exempt compounds]
   1. Multipurpose construction adhesives: 70 g/L

PART 3 EXECUTION

3.01 INSTALLATION

A. SEAL ATTIC BYPASSES: Seal all attic bypasses to include, but not limited to, chimneys, soil stacks, end walls, dropped ceilings, open plumbing walls, round duct work, electrical work, and attic access points. Seal all bypasses prior to insulating the attic.

Location: Attic

B. AIR SEAL RIM JOISTS: Seal all cracks and holes in basement rim joist and all open rim joists, throughout the dwelling, using caulk or foam.

Location: Throughout the dwelling

C. Provide continuous air barriers.
   1. Install continuous interior air barrier around the building
   2. Install continuous external air barrier between all conditioned space and unconditioned space.

D. **Compartmentalization of dwelling units:**
   1. Walls
      a. Seal exterior wall corners with joint sealant [and/or foam]
      b. Seal vertical walls at all penetrations with joint sealant [and/or foam]
      c. Seal window frame with low expanding foam
      d. Seal bottom plates on exterior walls with a foam gasket [and/or caulk, foam]
   2. Floors
      a. Provide complete seal at joists supporting conditioned space with joint sealant [and/or foam]
   3. Ceilings
      a. Install continuous top and bottom plates, and sheathing to create a six-sided air barrier on all attic knee walls and seal with foam [and/or caulk].
      b. Install blocking at exposed edges of insulation at joists and rafters
      c. Truss framing: Install blocking at the top and bottom of each framing bay.
      d. Seal attic hatches with joint sealant [and/or foam].
      e. Provide sealing around skylight shaft with joint sealant [and/or foam]
      f. Install baffles between all rafters or trusses to direct the flow of air over and above the attic insulation.
      g. Recessed lighting when below unconditioned attic: Install insulation contact, airtight rated (ICAT) and seal to drywall with gasket [and/or caulk, foam]
   4. Garage Isolation Air Barrier (when attached to dwelling unit)
      a. Install continuous air barrier between the conditioned living space and any garage space and seal with foam [and/or caulk].
      b. Seal between all walls separating conditioned and garages spaces with foam [and/or caulk].

c. All pipe and conduit penetrations shall be sealed with material compatible with the adjacent materials and resilient to temperature fluctuations and providing fire-resistive characteristics of required by authorize having jurisdictions.
d. Floor trusses: Seal and block floor trusses and joists between conditioned space and garage with foam [and/or caulk].

5. Bathtub and Shower Enclosures
   a. Use mold-resistant material [plywood, oriented strand board (OSB), sheathing boards, moisture resistant gypsum] behind bathtub or shower enclosures, and extend the mold-resistant material the full length and width of the wall(s) on which the bathtub or shower enclosure abuts. Seal at all joints.
   b. Install spray foam at framing behind bathtub or shower enclosure prior to setting tub or shower.

E. **Continuity of External Air Barrier**

1. Roof
   a. Install 4-inch to 6 inch "peal and seal" self-adhering waterproofing strips over joints in roof decking before installing the roof underlayment and cover.
2. Mechanical work
   a. Seal holes from penetrations from unconditioned spaces with joint sealant and provide flashing.
   b. Seal flue openings with flashing and fire-rated joint sealant
3. Building Envelope
   a. Air barrier must be continuous around building, including all components that act together as the exterior air barrier (sheet or liquid membrane with compatible tapes, caulks, flashing). Foam or caulk all exterior sheathing joints and intersections.
   b. Install weather-stripping hard-fastened to the door or frame at entranceways.
   c. Seal the roof curb at ductwork penetrations.
   d. Install continuous air barrier at the intersection of the porch roof and conditioned space.
   e. Air seal and insulate exterior sheathing on bottom of cantilevered floor.
   f. Lap and Foam or caulk exterior rigid insulation over the seams of the exterior wall sheathing.
4. Fireplace Enclosures
   a. Seal fireplace flue and wall penetrations with fire-rated caulking along with flashing or UL-rated collars.
5. Use air sealing with polyurethane caulk for following areas:
   a. Slab openings
   b. Slab penetrations
   c. Control or expansion joints
   d. Sump cover
6. Pest Management Measures
   a. For openings in the building envelope less than 1/4 inch, including pipe and electrical penetrations:
      1) Completely seal to avoid pest entry.
   b. Install rodent-and corrosion proof screens for openings greater than 1/4 inch.

ASPHALT SHINGLES

PART 1 GENERAL **$_____**

1.01 UNIT PRICES

A. Contractor is responsible for contacting specified vendor to arrange for and take delivery. Provide a bid price for the cost of the shingles, labor and any additional materials required to perform work to code.

1.02 QUALITY ASSURANCE

A. Perform Work in accordance with the recommendations of NRCA Steep Roofing Manual.

PART 2 PRODUCTS

2.01 SHINGLES

A. Asphalt Shingles: Asphalt-coated glass felt, mineral granule surfaced, complying with ASTM D3462; Class A fire resistance.
   1. Self-sealing type.
   2. Manufacturer: GAF ELK, Timberline 30 Year HD shingles
   3. Style: Architectural Shingle.
   4. Color: **See color & material sheet**

2.02 ACCESSORIES

A. Nails: Standard round wire shingle type, of hot-dipped zinc coated steel, 12 gage, 0.105 inch (2.67 mm) shank diameter, 3/8 inch (9.5 mm) head diameter, of sufficient length to penetrate through roof sheathing or 3/4 inch (19 mm) into roof sheathing or decking.

PART 3 EXECUTION

3.01 INSTALLATION - SHINGLES

1. ASPHALT OR FIBERGLASS SHINGLES: Install GAF Timberline High Definition shingles. Install GAF/ELK Timbertex ridge cap. Install all code required ice & water shield 6 feet up from all roof eaves and in all valleys and 15 # felt. **All shingles, ridge cap shingles, ice& water, and 15 # felt HAVE NOT been pre-purchased by the HRA for this project.** Provide & install all shingles, ridge cap shingles, ice& water, and 15 **#** felt, 1 1/4" galvanized roofing nails, Broan 636/634 bath fan covers, "W" style valley flashing, kick out flashing, dormer flashing, and step flashing as needed.

   Location: Exterior, dwelling & new garage roof.

2. OSB PLYWOOD: Patch in roof sheathing where masonry chimney will be removed per concrete and masonry section of work scope.

   Location: Exterior roof.

3. DRIP EDGE: Provide and install aluminum style "D" roof edge on all rakes and eaves of the dwelling roof prior to the installation of asphalt shingles.

   Location: Exterior dwelling & garage roof.

4. RIDGE VENT: Install a Continuous roof ridge vent with louvered side openings- include cutting existing shingles and sheathing

   Location: Exterior dwelling roof

5. Install shingles in accordance with manufacturer's instructions.

3.02 LOCATION

A. House

B. Garage

SECTION 07 4646

FIBER CEMENT SIDING

PART 1 GENERAL **$_____**

1.01 UNIT PRICE

A. Contractor is responsible for contacting specified vendor to arrange for and take delivery. Provide a bid price for labor and additional materials required to perform work to code.
   1. **Pre-primed LP Siding. (House & Garage Only)**

PART 2 PRODUCTS

2.01 SIDING

A. Lap Siding: Individual horizontal boards made of cement and cellulose fiber formed under high pressure with integral surface texture, complying with ASTM C1186 Type a Grade II; with machined edges, for nail attachment.
   1. Style: Standard lap style.
   2. Texture: Smooth.
   3. Length: 12 Ft. (3.7 m), nominal.
   4. Width (Height): 5-1/4 inches (133 mm).
   5. Thickness: 5/16 inch (8 mm), nominal.
   6. Finish: Factory applied primer. Finish painting to be applied by contractor.
   7. Color: As selected by Construction Manager from manufacturer's full range of available colors.
   8. Warranty: 50 year limited; transferable.

PART 3 EXECUTION

3.01 INSTALLATION

3.01 INSTALLATION

A. Install in accordance with manufacturer's instructions and recommendations.
   1. Read warranty and comply with all terms necessary to maintain warranty coverage.

B. CERTAINTEED LP SMARTBOARD SHAKE SIDING: Provide & Install Certainteed LP Smartboard staggered shake siding. Provide & install all MiraTec corners, master and split-mini mount blocks, dryer & intake vent covers, aluminum drip caps, caulking, galvanized nails, etc.

   Location: Front (North) elevation exterior gables

C. Do not install siding less than 6 inches (150 mm) from surface of ground nor closer than 1 inch (25 mm) to roofs, patios, porches, and other surfaces where water may collect.

D. CERTAINTEED LP SMARTBOARD LAP SIDING: Provide & install 6" lap Certainteed LP Smartboard siding. Provide & install all MiraTec corners, exterior trim/band boards, master and mini mount blocks, aluminum drip caps, caulking, galvanized nails, labor, etc. All Certainteed LP Smartboard siding & accessories are required to be installed to all manufacturers' specifications.

   Location: All house exterior walls and gable ends on the rear (South) elevation.

   And all garage exterior walls and gable ends.

SECTION 07 6200

SHEET METAL FLASHING AND TRIM

PART 1 GENERAL **$_____**

1.01 QUALITY ASSURANCE

A. Perform work in accordance with SMACNA Architectural Sheet Metal Manual requirements and standard details, except as otherwise indicated.

PART 2 PRODUCTS

2.01 SHEET MATERIALS

A. Aluminum: ASTM B209 (ASTM B209M); 0.032 inch (0.8 mm) thick; anodized finish of color as selected.
   1. Clear Anodized Finish: AAMA 611 AA-M12C22A41 Class I clear anodic coating not less than 0.7 mils (0.018 mm) thick.

B. Pre-Finished Aluminum Soffit, Trim and Facia: ASTM B209 (ASTM B209M); ____ inch (____ mm) thick; plain finish shop pre-coated with modified silicone coating.
   1. Manufacturer: Alsco Perfect Trim Plus

PART 3 EXECUTION

3.01 INSTALLATION

A. Secure flashings in place using concealed fasteners. Use exposed fasteners only where permitted.

B. Seal metal joints watertight.

C. FASCIA OR FRIEZE: Remove and replace fascia & with #2 Pine 1” x nominal boards.

Location: Exterior fascia, crown molding. Only areas that have been damaged rotted, deteriorated, or missing.

D. SOFFIT: Remove and replace soffits with a pine ½” plywood soffit furring strips for new aluminum center vented soffit. Leave the center section on these soffits open on all eaves for proper ventilation.

Location: Exterior soffits

E. ALUMINUM FASCIA: Install 6” EDCO custom bent aluminum fascia on all rakes, eaves, and box end returns. **See color & material sheet.**

Location: Exterior, fascia house and new garage. See Plans.

F. ALUMINUM SOFFIT: Install EDCO aluminum, center vented soffit panels, f-channel and soffit channel on all rakes, eaves, and box end returns. **See color & material sheet.**

Location: Exterior, soffit house and new garage. See Plans.

G. EXTERIOR WNIDOW & DOOR TRIM: Cap all existing window & door exterior trim with EDCO aluminum coil. Miter all corners and caulk to prevent water & air infiltration. Repair any window or door trim that is damaged, rotted, deteriorated, or missing prior to capping with aluminum coil. **See color & material sheet.**

Location: Exterior, windows and doors.

END OF SECTION

SECTION 07 7123

MANUFACTURED GUTTERS AND DOWNSPOUTS

PART 1 GENERAL **$_____**

1.01 DESIGN REQUIREMENTS

A. Conform to applicable code for size and method of rain water discharge.

PART 2 PRODUCTS

2.01 MATERIALS

A. Pre-Finished Aluminum Sheet: ASTM B209 (ASTM B209M); 0.032 inch (0.8 mm) thick.
   1. Finish: Plain, shop pre-coated with modified silicone coating.
   2. Color: To match the exterior trim.

2.02 COMPONENTS

A. Gutters: K style profile, seamless, one-piece aluminum gutter and guard

B. Gutter Guard: seamless, one-piece aluminum gutter and guard

C. Downspouts: SMACNA Rectangular profile.
   1. Size: 3X5

D. Anchors and Supports: Profiled to suit gutters and downspouts.
   1. Gutter Supports: Brackets.
   2. Downspout Supports: Straps.

E. Fasteners: Galvanized steel, with soft neoprene washers.

2.03 ACCESSORIES

A. Splash Pads: Precast concrete type, size and profiles indicated; minimum 3000 psi (21 MPa) at 28 days, with minimum 5 percent air entrainment.

PART 3 EXECUTION

3.01 INSTALLATION

1. Install gutters, downspouts, and accessories in accordance with manufacturer's instructions.
2. Where feasible, a minimum of 6' offset extension shall be installed at the ends of all downspouts to divert water away from foundation.
3. Downspouts shall divert the entire water load in the direction of the rain garden according to the Landscape Plan.
4. GUTTERS AND DOWNSPOUTS: Provide and install 5” aluminum seamless gutters, with oversized 3” x 4” downspouts fastened to the exterior walls. Gutter to be fastened to home with the proper hangers for installation on fascia including on crown. All downspout extensions shall be hinged and extend a minimum of 6’ out where applicable. Install rain leaders at the base of each downspout. Gutters & downspouts to be EDCO aluminum seamless to match the soffit and fascia color.

   Location: Exterior on all eaves of house

END OF SECTION

SECTION 08 3323

OVERHEAD GARAGE DOORS **$_____**

PART 2 PRODUCTS

1.01 COILING DOORS

A. Exterior Coiling Doors: Aluminum slat curtain.
   1. Guides: Formed track; galvanized steel.
   2. Electric operation.
   3. Mounting: Within framed opening.
   4. Exterior lock and latch handle.

1.02 ELECTRIC OPERATION

A. Electric Operators: Chain Drive Garage Door Opener
   1. Motor Rating: 1/3 hp (250 W); continuous duty.
   2. Motor Controller: NEMA ICS 2, full voltage, reversing magnetic motor starter.
   3. Controller Enclosure: NEMA 250 Types 1.
   4. Opening Speed: 12 inches per second (300 mm/s).
   5. Brake: Adjustable friction clutch type, activated by motor controller.
   6. Manual override in case of power failure.

B. Control Station: Standard three button (OPEN-STOP-CLOSE) momentary control for each operator.
   1. 24 volt circuit.

C. Safety Edge: Located at bottom of curtain, full width, electro-mechanical sensitized type, wired to stop operator upon striking object, hollow neoprene covered.

PART 3 EXECUTION

2.01 INSTALLATION

A. Install units in accordance with manufacturer's instructions.

B. Fit and align assembly including hardware; level and plumb, to provide smooth operation.

C. Complete wiring from disconnect to unit components.

D. GARAGE DOOR, STEEL: Install a 4 section 4 panel non-insulated overhead door. Including weather tight stops, hardware and exterior, vinyl brick mold and jamb trim, 16’-0” x 7’-0” garage door.

2.02 LOCATION

A. Garage

EXTERIOR INSULATED METAL DOORS AND FRAMES

PART 1 GENERAL **$_____**

PART 2 PRODUCTS

2.01 EXTERIOR PREHUNG METAL DOOR

A. Front Doors:
   1. Product: Rochester, Patina- A73190

B. Rear/Side Doors:
   1. Product: Master craft, Half Lite w/ Blinds - LT-10

C. Garage Service Door:
   1. Product: Master craft, 6-Panel - E-1.

2.02 ALUMINUM STORM DOORS

A. Front Door
   1. Product: Larson, Oakley, or approved equivalent

B. Rear/Side Doors
   1. Product: Larson, Oakley, or approved equivalent

2.03 ACCESSORIES

A. DOOR HARDWARE: Door hardware finish to be black finish
   1. Front Door Hardware: Schlange Avanti
   2. Interior Door Hardware: Schlange Avanti

PART 3 EXECUTION

3.01 EXAMINATION

A. Examine doors and installed door frames before hanging doors.
   1. Verify that frames comply with indicated requirements for type, size, location, and swing characteristics and have been installed with level heads and plumb jambs.
   2. Reject doors with defects

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.02 INSTALLATION

A. Install in accordance with manufacturer's instructions.

B. Use expanding foam to insulate between the door frame and the rough opening.

C. Set units plumb, level, and true-to-line, without warping or racking doors, and with specified clearances; anchor in place.

D. Align and fit doors in frames with uniform clearances set by manufacturer.

E. Seal edges of doors, edges of cutouts, and mortises after fitting and machining

F. EXTERIOR DOOR REMOVAL: Remove door, frame, and trim from existing exterior wall.

   Location: All exterior entrance doors and storm doors

G. ENTRANCE DOORS: Install an insulated steel paneled, 1-3/4” thick, 6” exterior trim and wood frame, entrance lock and dead bolt, aluminum sill and weather stripping. **Refer to sections 2.01 & 2.03 above.**

   Location: Front & rear exterior doors

H. ALUMINUM STORM/SCREEN COMBINATION DOORS: Install a full view, with 1 tempered glass and 1 screen insert, colonial fringe, handle, kick panel, premium white combination door by Larson or approved equivalent. **Refer to section 2.02 above.**

Location: On exterior trim of all exterior entrance doors

I. SERVICE DOOR: Install a steel 6-panel exterior garage service door including a door knob and deadbolt. **NOTE: Steel door, entry knob, and pine shims have been pre-purchase by the HRA for this item. Please include the cost of the labor and any additional materials needed for this item.**

Location: Garage

3.03 SYSTEMS INTEGRATION

A. Coordinate with low-voltage security contractor to install contacts in door.

3.04 ADJUSTING

A. Adjust Doors for smooth operation.

B. Operation: Rehang or replace doors that do not swing or operate freely.

3.05 LOCATIONS

A. Front Entrance - Door and Storm

B. Rear Entrance - Door and Storm

C. Garage Service door

END OF SECTION

SECTION 08 5313

VINYL WINDOWS

PART 1 GENERAL $_____

1.01 PERFORMANCE REQUIREMENTS

A. Performance Requirements: Energy Star Rated to meet Minnesota climate conditions. Climate Zone 6 for 2006 IECC, ASHRAE 90.1-2007 and ENERGY STAR.

PART 2 PRODUCTS

2.01 COMPONENTS

A. Windows: Extruded, hollow, tubular, ultra-violet resistant polyvinyl chloride (PVC) with integral color; factory fabricated; with vision glass, related flashings, anchorage and attachment devices.
   1. Performance Requirements: AAMA/WDMA/CSA 101/I.S.2/A440 R15.
   2. Configuration: double hung and fixed double hung sash.
   3. Color: Color as selected.

B. Insect Screens: 14/18 mesh, steel strands.

C. Fasteners: Stainless steel.

2.02 ADHESIVES AND SEALANTS

A. VOC content not to exceed the following [g/L; less water and less exempt compounds]:
   1. Multipurpose Construction Adhesives: 70 g/L
   2. Structural Glazing Adhesives: 100 g/L

2.03 HARDWARE

A. Double Hung Sash: Metal and nylon spiral friction slide cylinder, each sash, each jamb.

B. Sash lock: Lever handle with cam lock.

PART 3 EXECUTION

3.01 INSTALLATION

A. Install window units in accordance with manufacturer's instructions.

B. Attach window frame and shims to perimeter opening to accommodate construction tolerances and other irregularities.

C. Align window plumb and level, free of warp or twist. Maintain dimensional tolerances and alignment with adjacent work.

D. Insulate any voids between the window frame and the rough opening with foam insulation.

E. Floor to sill height on new window openings should be consistent to that of the existing window openings in each window

F. VINYL WINDOWS: Install vinyl replacement "pocket" windows by Atrium or equivalent. Low-E/argon glass. Energy Star rated with insect screens. Vertical grid bars on the both sashes of all double hung windows. A vertical grid bar and a centered horizontal grid bar shall be installed on all casement windows to simulate the look of the double hung windows. General Contractor is required to do a walk through with the project manager prior to ordering of the new windows.

G. All bedroom windows to be double hung windows unless they do not meet egress window requirements for bedrooms. In this case, install one casement window in bedroom. Location to be chosen by the project manager.

H. On the living room North exterior wall, install two side-by-side double hung windows.
Location: Living room, North exterior wall

I. On the living room West exterior wall, install a double hung window.
Location: Living room, West exterior wall

J. On the dining room North exterior wall, install a double hung window. Remove the exterior door that is

currently in this location. Frame in the exterior wall opening to match the sill and head height of the living room North exterior wall side-by-side double hung windows. Window unit dimension width to be 24".
Location: Dining room, North exterior wall

K. On the dining room West exterior window bump out wall, install a double hung window.
Location: Dining room, West exterior wall

L. On the dining room East exterior wall, install two side-by-side double hung windows.
Location: Dining room, East exterior wall

M. On the kitchen South exterior house wall, install a double hung window above the new kitchen sink location. Raise window sill height to 44" off of the finished floor. Keep window width and head height the same as the existing window unit.
Location: Kitchen, South exterior wall

N. On the main floor bathroom East exterior house wall, install a double hung window. This window to have tempered glass as it is located within 5' of a tub or shower.
Location: Main floor bathroom, East exterior wall

O. On the 2nd floor bedroom 1, North exterior wall, install two double hung side-by-side windows if the current openings meet egress window minimum requirements. If the current openings so not meet egress window minimum requirements then install two side-by-side casement windows; one right hinge & one left hinge windows. Verify if windows need to be tempered due to the height off of the finished floor to the glass area of the window, or due to the closet door swinging into the window sash.

Location: 2nd Floor bedroom 1, North exterior wall

P. On the 2nd floor bedroom 2, West exterior wall, install two double hung side-by-side windows if the current openings meet egress window minimum requirements. If the current openings so not meet egress window minimum requirements then install two side-by-side casement windows; one right hinge & one left hinge windows. Verify if windows need to be tempered due to the height off of the finished floor to the glass area of the window, or due to the closet door swinging into the window sash.

Location: 2nd Floor bedroom 2, West exterior wall

Q. On the 2nd floor master bedroom, West exterior wall, install a double hung window in the same opening UNLESS egress window requirements are not met. In this case, install a left hinged casement window. Verify the casement hinged swing with the project manager prior to ordering the windows. Verify if windows need to be tempered due to the height off of the finished floor to the glass area of the window.

Location: 2nd Floor master bedroom, West exterior wall

R. On the 2nd floor master bedroom, South exterior wall, install a double hung window. Verify if windows need to be tempered due to the height off of the finished floor to the glass area of the window.

Location: 2nd floor master bedroom, South exterior wall

S. On the 2nd floor master bedroom closet/sitting area, West exterior wall, install a double hung window. Verify if windows need to be tempered due to the height off of the finished floor to the glass area of the window.

Location: 2nd Floor master closet/sitting area, West exterior wall

T. On the 2nd Floor master closet/sitting area, South 2nd floor addition exterior wall, relocate existing window opening to the Southwest corner of 2nd floor addition exterior wall. New opening size to match that of the

existing opening height & width and sill & head height of the window on the South 2nd floor addition exterior wall. Infill existing window opening with wood framing members and sheathing and frame and install a properly sized header and bearing for the new window opening location. On the 2nd floor master bedroom closet/sitting area, Southwest exterior wall new framed opening, install a double hung window. Verify if windows need to be tempered due to the height off of the finished floor to the glass area of the window.
Location: 2nd Floor master closet/sitting area, South exterior wall

U. On the 2nd floor main bathroom, East exterior wall, install a tempered glass double hung window. This window needs to have tempered glass as it is located within 5' of a tub or shower.

.

Location: 2nd floor main bathroom, East exterior wall

V. On the 2nd floor common area, East exterior wall, install two side-by-side double hung windows. Verify if windows need to be tempered due to the height off of the finished floor to the glass area of the window.

Location: 2nd floor common area, East exterior wall

W. On the garage, East and West exterior walls, install a 4' wide by 2' high new construction style with nailing fin awing window.
Location: Garage East & West exterior walls
NOTE: These windows HAVE been pre-purchased by the HRA on this project. Please include the cost of labor and any additional materials required to install the windows per building code.

X. WINDOW REMOVAL: Remove window from wall, including wood stops.
Location: All windows throughout the home

3.02 ADJUSTING

A. Adjust hardware for smooth operation and secure weather tight closure.

3.03 APPLICATIONS

A. Water Management: Walls, Exterior Windows
   1. Provide weather-resistive barrier/house wrap
   2. Provide pathway for liquid water to exit exterior wall assembly
   3. Provide pan flashing, side flashing, and head flashing

END OF SECTION

SECTION 09 2116

GYPSUM BOARD & DURAROCK INSTALLATION

PART 1 GENERAL **$_____**

PART 2 PRODUCTS

2.01 GYPSUM BOARD ASSEMBLIES

A. Provide completed assemblies complying with ASTM C840 and GA-216.

2.02 BOARD MATERIALS

A. Gypsum Wallboard: Paper-faced gypsum panels as defined in ASTM C1396/C1396M; sizes to minimize joints in place; ends square cut.
   1. Application: Use for vertical surfaces and ceilings, unless otherwise indicated.
   2. Thickness:
      a. Vertical Surfaces: 1/2 inch (13 mm).
      b. Ceilings: 1/2 inch (13 mm).

B. Backing Board for Wet Areas: One of the following products: **DURAROCK**
   1. Application: Surfaces behind tile in wet areas including tub and shower surrounds and shower ceilings.

2.03 ACCESSORIES

A. Joint Materials: ASTM C475 and as recommended by gypsum board manufacturer for project conditions.
   1. Tape: 2 inch (50 mm) wide, creased paper tape for joints and corners, except as otherwise indicated.
   2. Ready-mixed vinyl-based joint compound.
   3. Powder-type vinyl-based joint compound.
   4. Chemical hardening type compound.

PART 3 EXECUTION

3.01 BOARD INSTALLATION

A. Comply with ASTM C840, GA-216, and manufacturer's instructions. Install to minimize butt end joints, especially in highly visible locations.

B. Single-Layer Non-Rated: Install gypsum board in most economical direction, with ends and edges occurring over firm bearing.

C. GYPSUM DRYWALL ON CEILING: Install ½" gypsum drywall on ceilings screwed to joists or furring, taped, finished and sanded.

Location: All ceilings throughout the dwelling EXCEPT FOR the basement ceiling. Install ¾" wood furring strips, prior to installing ½" drywall, on all loose or deteriorated plaster ceilings that are not removed during demolition.

D. GYPSUM DRYWALL ON WALL: Install ½" gypsum drywall on walls screwed into studs or furring, taped, finished and sanded, 3 coats

Location: All new wood framed walls or walls opened during demolition. Install ¼" drywall on all loose or deteriorated plaster walls that are not removed during demolition.

E. WALL DURAROCK BACKER BOARD: Install a water resistant ½" thick backer board underlayment for ceramic tile walls, including thin set mortar, joint tape and galvanized screws.

Location: Kitchen backsplash & 2nd floor main bathroom tub/shower surround.

F. FLOOR DURAROCK BACKER BOARD: Install a water resistant ¼" thick backer board underlayment for ceramic tile floors, including thin set mortar, joint tape and galvanized screws.

Location: Both bathrooms, kitchen, 1st floor laundry room, front entry, and rear entry

3.02 JOINT TREATMENT

A. Finish gypsum board in accordance with levels defined in ASTM C840, as follows:
   1. Level 4: Walls and ceilings to receive paint finish or wall coverings, unless otherwise indicated.
   2. Level 1: Fire rated wall areas above finished ceilings, whether or not accessible in the completed construction.

END OF SECTION

SECTION 09 3000

TILING

PART 1 GENERAL **$_____**

1.01 ALLOWANCES-NONE-

1.02 FIELD CONDITIONS

A. Do not install adhesives in an unventilated environment.

B. Maintain ambient and substrate temperature of 50 degrees F (10 degrees C) during installation of mortar materials.

PART 2 PRODUCTS

2.01 TILE-SEE COLOR & MATERIAL SHEET

A. Glazed Wall Tile Type Ceramic
   1. Wall Tile Colors: White Subway Tile 6" * 3" field tiles with 2" * 6" bullnose perimeter tiles
   2. Floor Tile Colors: Florim 12" * 12"

2.02 TRIM AND ACCESSORIES

A. Ceramic Accessories: Glazed finish, same color and finish as adjacent field tile; same manufacturer as tile.

B. Ceramic Trim: Matching bullnose, double bullnose, cove base, and cove ceramic shapes in sizes coordinated with field tile.

C. Thresholds: Marble, white, honed finish; 2 inches (50 mm) wide by full width of wall or frame opening; 1/2 inch (12 mm) thick; beveled one long edge with radiused corners on top side; without holes, cracks, or open seams.

2.03 GROUT MATERIALS

A. Standard Grout: Any type specified in ANSI A118.6 or A118.7.

PART 3 EXECUTION

3.01 INSTALLATION - GENERAL

A. Install tile, thresholds, and stair treads and grout in accordance with applicable requirements of ANSI A108.1 through A108.13, manufacturer's instructions, and The Tile Council of North America Handbook recommendations.

B. Lay tile to pattern indicated. Do not interrupt tile pattern through openings.

3.02 INSTALLATION - FLOORS

A. TILE FLOORING: Install a ceramic tile floor in both bathrooms, kitchen, 1st floor laundry, front entry, and rear entry.
Set 12"x 12" tiles in thin set mortar. Grout and seal with silicone type sealer. Install over 1/4" Dura rock moisture-resistant board. Owner to pick out tile & grout colors and tile installation pattern. **See Color & Material Sheet**

Location: Both bathrooms, kitchen, 1st floor laundry, front entry, and rear entry.
See plans

B. Over wood substrate with backer board underlayment, install in accordance with The Tile Council of North America Handbook Method F144, for cementitious backer boards, with standard grout.

3.03 INSTALLATION - FLOORS - MORTAR BED METHODS

A. Over wood substrates, install in accordance with The Tile Council of North America Handbook method F141, with standard grout, unless otherwise indicated.

3.04 INSTALLATION – SHOWERS-BATHTUB WALLS-KITCHEN BACKSPLASH

A. CERMANIC TILE WALLS: Install ceramic tile 6" * 3" white subway tile on kitchen base cabinet backsplash and over ½" Dura rock moisture-resistant wallboard; set 6" * 3" tiles in thin set mortar, set 2" * 6" tile cap, grout and seal with silicone type sealer. Owner to pick out tile & grout colors.

Location: Kitchen backsplash above all base wall cabinet countertops to the bottom of the upper wall cabinets and in the 2nd floor bathroom tub/shower surround area from the top of the tub to the ceiling.

B. At tiled shower receptors install in accordance with The Tile Council of North America Handbook Method B415, mortar bed floor, and W244, thin-set over cementitious backer unit walls.

C. At bathtub walls install in accordance with The Tile Council of North America Handbook Method B412, over cementitious backer units with waterproofing membrane.

D. Grout with standard grout as specified above.

E. Over cementitious backer units on studs, install in accordance with The Tile Council of North America Handbook Method W244, using membrane at toilet rooms.

3.05 LOCATIONS

A. Tile Walls
   1. 2nd Floor Main Bathroom Bathtub Tile Tub/Shower Surround
   2. Kitchen Backsplash

B. Tile Floors
   1. Both 1st & 2nd Floor Bathrooms
   2. 1st Floor Laundry
   3. Front Entry
   4. Rear Entry

CARPETING

PART 1 GENERAL **$_____**

1.01 ALLOWANCES-NONE

1.02 FIELD CONDITIONS

A. Maintain minimum 70 degrees F (21 degrees C) ambient temperature 24 hours prior to, during and 24 hours after installation.

B. Ventilate installation area during installation and for 72 hours after installation.

PART 2 PRODUCTS

2.01 CARPET

A. Carpet Type Shaw Anso Yarn Texture Serenity Garden: Tufted, nylon, conforming to the following criteria:
   1. FHA Approved
   2. VOC Content: Provide CRI Green Label Plus certified product; in lieu of labeling, independent test report showing compliance is acceptable.

2.02 CUSHION

A. Cushion: Cellular rubber:
   1. VOC Content: Provide CRI Green Label Plus certified product; in lieu of labeling, independent test report showing compliance is acceptable.

2.03 ACCESSORIES

A. Tackless Strip: Carpet gripper, of type recommended by carpet manufacturer to suit application, with attachment devices.

B. Adhesives - General: Compatible with materials being adhered; maximum VOC content of 50 g/L; CRI Green Label certified; in lieu of labeled product, independent test report showing compliance is acceptable.

C. Seam Adhesive: Recommended by manufacturer.

PART 3 EXECUTIONS

3.01 INSTALLATION

A. Lay out carpet and locate seams in accordance with shop drawings:
   1. Locate seams in area of least traffic, out of areas of pivoting traffic, and parallel to main traffic.
   2. Align run of pile in same direction as anticipated traffic and in same direction on adjacent pieces.
   3. CARPETING: Furnish and install interior carpeting, including padding.
      Location: Living room, dining room, main staircase, basement staircase, and the entire 2nd floor EXCEPT FOR the bathroom. See plans

3.02 STRETCHED-IN CARPET

A. Install tackles strips with pins facing the wall around entire perimeter, except across door openings. Use edge strip where carpet terminates at other floor coverings.

B. Double cut carpet seams, with accurate pattern match. Make cuts straight, true, and unfrayed. Apply seam adhesive to all cut edges immediately.

C. Join seams by hand sewing. Form seams straight, not overlapped or peaked, and free of gaps.

D. Following seaming, hook carpet onto tack less strip at one edge, power stretch, and hook firmly at other edges. Follow manufacturer's recommendations for method and amount of stretch.

E. The carpet should be stretched to eliminate puckers, scallops and ripples.

SECTION 09 9000

PAINTING AND COATING

PART 1 GENERAL **$_____**

1.01 DELIVERY, STORAGE, AND HANDLING

A. Deliver products to site in sealed and labeled containers; inspect to verify acceptability.

B. Paint Materials: Store at minimum ambient temperature of 45 degrees F (7 degrees C) and a maximum of 90 degrees F (32 degrees C), in ventilated area, and as required by manufacturer's instructions.

1.02 FIELD CONDITIONS

A. Do not apply materials when surface and ambient temperatures are outside the temperature ranges required by the paint product manufacturer.

PART 2 PRODUCTS

2.01 MANUFACTURERS

A. Paints and Coatings: Sherwin Williams Low VOC or any manufacturer listed in MPI Approved Products List (at www.paintinfo.com) approved by Project Manager.
   1. Provide all paint and coating products used in any individual system from the same manufacturer; no exceptions.
   2. Provide all paint and coating products from the same manufacturer to the greatest extent possible.

B. Stains: Minwax Low VOC or any other manufacturer approved by Project Manager

2.02 MATERIALS - GENERAL

A. Volatile Organic Compound (VOC) Content:
   1. Provide coatings that comply with the most stringent requirements specified in the following:
      a. Flat: 50 grams/Liter
      b. Non-Flat: 50 grams/Liter
      c. Floor Coating: 100 grams/Liter
      d. Anti-Corrosive: 250 grams/Liter

2.03 PAINT SYSTEMS

A. Provide Premium Grade systems (2 top coats) as defined in MPI Architectural Painting Specification Manual, except as otherwise indicated.

B. Where a specified paint system does not have a Premium Grade, provide Custom Grade system.

C. Where sheen is not specified or more than one sheen is specified, sheen will be selected later by Construction Manager from the manufacturer's full line.

D. Provide colors as directed by Construction Manager.

E. Provide smooth texture throughout.

2.04 EXTERIOR PAINT SYSTEMS-SEE COLOR & MATERIAL SHEET

A. Wood Traffic Surfaces:
   1. Applications include but are not limited to Decks.
   2. EXT 6.5D Deck Stain: Wood Preservative MPI #37, Deck Stain MPI #33.
   3. PAINT COLUMNS: Paint 5” turned colonial wood porch columns. Paint two coats of exterior, low or no VOC paint. Project manager to choose paint finish, colors, and scheme for columns.

Location: Front porch

4. PAINT PORCH BEAM OR HEADER TRIM: Paint porch header trim, two faces and one edge. 2 coats of exterior, low or no VOC, paint or solid stain. Project manager to choose the color and finish of paint or solid stain.
   Location: Front header and trim

5. PORCH CEILING: Stain porch ceiling, 1 coat of stain and 2 coats of varnish. Stain and varnish to be low or no VOC. Project manager to choose the stain color
   Location: Exterior, Front porch

6. WOOD DECK FLOOR, STAIRS, AND BAND BOARD: Stain/seal or clear finish, 2 coats. 1 coat of exterior stain, 2 coats of exterior water sealer. Low or no VOC stain & water sealer. Stain color and finish to be chosen by the project manager.
   Location: Front porch

7. 2 TO 6 PANEL ENTRANCE DOOR: Paint all exterior entrance doors with two coats of low or no VOC paint. Paint colors and finishes to be chosen by the project manager.
   Location: Front & rear entry door

8. STAIN WOOD FENCE: Stain an exterior wood fence with 2 coats of low or no VOC exterior grade stain/sealer. Stains finish color to be chosen by the project manager.
   Location: West property line

2.05 INTERIOR PAINT SYSTEMS

A. Dressed Lumber:
   1. Applications include but are not limited to doors, door frames, window frames, window casings, trim, baseboards, and moldings.

   2. TEXTURE CEILING FINISH: Spray finish drywall ceiling with knockdown (orange peel) texture.
      Location: All ceilings EXCEPT for the kitchen and bathrooms. Leave kitchen and bathroom ceilings smooth.

   3. WALLS: Paint smooth finish plaster or plasterboard, with roller; Prime and paint 2 coats on interior walls with low or no VOC paint. Paint colors and finishes to be chosen by the project manager.
      Location: Throughout the house

   4. CEILINGS: Paint smooth finish or texture finish plaster or plasterboard, prime and 1 coat with flat white ceiling paint. Low or no VOC paint.
      Location: Throughout the house

   5. PAINT/STAIN OPEN SPINDLED RAILINGS AND GRASPABLE HANDRAILS: Paint open spindled railing spindles with 2 coats with white semi-gloss, low or no VOC paint. Stain/varnish graspable wall hung handrails and top and bottom rails of open spindled railing with low or no VOC stain. 1 coat of stain, 2 coats of varnish.
      Location: Throughout the dwelling

PART 3 EXECUTIONS

3.01 SCOPE -- SURFACES TO BE FINISHED

A. Paint all exposed surfaces except where indicated not to be painted or to remain natural; the term "exposed" includes areas visible through permanent and built-in fixtures when they are in place.

B. Paint the surfaces described in PART 2 and as follows:
   1. If a surface, material, or item is not specifically mentioned, paint in the same manner as similar surfaces, materials, or items, regardless of whether colors are indicated or not.
   2. Paint surfaces behind movable equipment and furnishings the same as similar exposed surfaces.
   3. Paint surfaces to be concealed behind permanently installed fixtures, equipment, and furnishings, using primer only, prior to installation of the permanent item.
   4. Paint back sides of access panels and removable and hinged covers to match exposed surfaces.

C. Do Not Paint or Finish the Following Items:
   1. Items fully factory-finished unless specifically noted; factory-primed items are not considered factory-finished.
   2. Items indicated to receive other finish.
   3. Items indicated to remain naturally finished.
   4. Fire rating labels, equipment serial number and capacity labels, and operating parts of equipment.

3.02 APPLICATION

A. Apply products in accordance with manufacturer's instructions and as specified or recommended by MPI Manual, using the preparation, products, sheens, textures, and colors as indicated.

B. Do not apply finishes over dirt, rust, scale, grease, moisture, scuffed surfaces, or other conditions detrimental to formation of a durable coating film; do not apply finishes to surfaces that are not dry.

C. Use applicators and methods best suited for substrate and type of material being applied and according to manufacturer's instructions.

D. Minimum Coating Thickness: Apply paint materials no thinner than manufacturer's recommended spreading rate; provide total dry film thickness of entire system as recommended by manufacturer.

E. Apply finish to completely cover surfaces with uniform appearance without brush marks, runs, sags, laps, ropiness, holidays, spotting, cloudiness, or other surface imperfections.

3.03 LOCATIONS

A. Throughout House
   1. Walls and Ceilings: Flat Sherwin Williams Low VOC
      a. Wall Color: **See Color & Material Sheet**
      b. Ceiling Color: **See Color & Material Sheet**
   2. Interior Trim: Semi-gloss Sherwin Williams Low VOC
      a. Open Spindled Railings & Graspable Handrails: **See Color & Material Sheet**

B. Kitchen and Bath
   1. Walls and Ceilings: Eggshell Sherwin Williams Low VOC
      a. Wall Color: **See Color & Material Sheet**
      b. Ceiling Color: **See Color & Material Sheet**

C. Exterior:

1. Front Porch Floor- Clear coat sealer
2. Stain Front Porch Skirt/Header Trim- Solid base white stain

END OF SECTION

SECTION 09 9723
CONCRETE AND MASONRY COATINGS

PART 1 GENERAL **$_____**

PART 2 PRODUCTS

2.01 MATERIALS

A. Coatings - General: Provide complete systems formulated and recommended by manufacturer for the applications indicated, in the thicknesses indicated.

PART 3 EXECUTIONS

3.01 PRIMING

A. Apply primer to all surfaces, unless specifically not required by coating manufacturer. Apply in accordance with coating manufacturer's instructions.

3.02 COATING APPLICATION

A. Apply coatings in accordance with manufacturer's instructions, to thicknesses specified.

B. Apply in uniform thickness coats, without runs, drips, pinholes, brush marks, or variations in color, texture, or finish. Finish edges, crevices, corners, and other changes in dimension with full coating thickness.

3.03 LOCATIONS

A. Basement Foundation Walls - Dry Lock by ULG, or like product.

B. Basement Floor - concrete floor grey

END OF SECTION

SECTION 10 5623
CLOSET STORAGE SHELVING

PART 1 GENERAL **$_____**

1.01 SUBMITTALS

A. Product Data: Manufacturer's data sheets on each product to be used, with installation instructions.

PART 2 PRODUCTS

2.01 SHELVING APPLICATIONS

A. Shelf Depth: 12 inches (305 mm), unless otherwise indicated.

B. Other Bedroom Closets:
   1. Wall-to-wall shelf with free sliding hanger rod.
   2. Not less than 4 feet (1.25 m) of shoe shelf.

C. Coat Closets:
   1. Wall-to-wall shelf with integral hanger rod.

D. Linen Closets:
   1. Wall-to-wall shelves spaced at 13 inch (330 mm) vertically, not less than 16 inches (408 mm) deep.

E. Storage Closets:
   1. Wall-to-wall storage shelves, stacked at 13 inch (330 mm) vertically, not less than 12 inch (305 mm) deep.

2.02 MATERIALS

A. Wire Shelving: Factory-assembled coated wire mesh shelf assemblies for wall-mounting, with all components and connections required to produce a rigid structure that is free of buckling and warping.
   1. Construction: Cold-drawn steel wire with average tensile strength of 100,000 psi (690 MPa) resistance welded into uniform mesh units, square, rigid, flat, and free of dents or other distortions, with wires trimmed smooth.
   2. Coating: PVC or epoxy, applied after fabrication, covering all surfaces.
   3. PVC Coating: 9 to 11 mils (0.23 to 0.028 mm) thick.
   4. Epoxy Coating: Non-toxic epoxy-polyester powder coating baked-on finish, 3 to 5 mils (0.76 to 1.27 mm) thick.
   5. Standard Mesh Shelves: Cross deck wires spaced at 1 inch (25.4 mm).
   6. Close-Mesh Shelves: Cross deck wires spaced at 1/2 inch (12.7 mm).
   7. Shelf and Rod Units: Integral hanging rod at front edge of shelf.
   8. Free-Sliding Hanging Rod: Integral hanging rod that permits uninterrupted sliding of hangers the full width of the shelf.
   9. Shoe Shelves: Same wire spacing as standard mesh shelves; angled wall brackets; upturned front lip.

B. Fasteners: As recommended by manufacturer for mounting substrates.

3 EXECUTION

3.01 INSTALLATION

A. Install in accordance with manufacturer's instructions, with shelf surfaces level.

B. Install back clips, end clips at side walls, and support braces at open ends. Install intermediate support braces as recommended by manufacturer.

3.02 LOCATIONS

A. Closets Throughout

SECTION 10 7446

WINDOW WELLS

PART 1 GENERAL **$_____**

PART 2 PRODUCTS

2.01 MANUFACTURER

A. Product: St. Paul Corrugating Lux-Right Area Walls, Economy Grade, or like product approved by Construction Manager or Project Manager.

B. Manufactured from 18 gauge, pre-galvanized, regular spangle steel sheets.

C. Limitations: Care should be used in selecting the style and grade of larger and deeper window wells, which should be specified in heavier gauge and properly supported during backfill and while other construction activity is taking place.

2.02 ACCESSORIES

A. Fasteners: Use masonry nails, self-drilling anchors or other approved fasteners..

PART 3 EXECUTION

3.01 INSTALLATION

A. Install in accordance with manufacturer's instructions.

B. Window wells should be extended beyond the rough opening for the window by at least 3". Some building codes will require additional clearance.

C. Top of the window wells should be 2" above the established grade line and down at least 12" below the windowsill.

D. Install proper gravel for drainage.

3.02 LOCATIONS

A. All basement windows that require a window well by code.

PART 3 EXECUTIONS

3.01 INSTALLATION

A. Provide a city plumbing permit

B. PLUMBING ROUGH-IN: Remove all plumbing fixtures to include: sinks, faucets, fiberglass tub, toilets, etc. Rough in new location for kitchen sink. Install hook ups for the dishwasher and an ice maker for the refrigerator for new kitchen layout. Relocate plumbing on the main floor for bathroom group to be a 3/4 bathroom group with a neo angle corner shower. Rough in for full bathroom, on the 2nd floor, in new location per plan. New 2nd floor bathroom rough in to include tub, toilet, shower, and double vanity. Rough in laundry box and laundry tub sink for new main level laundry location. Remove all pitted cast iron waste and replace with new ABS piping.

   Location: Throughout the house. See plans.

C. HOSE BIBB: Furnish and install one frost-free hose bibb with shut off valve.

   Location: Exterior

D. WATER METER: Raise water meter off the floor 12” x 48” per city code.

   Location: Basement

E. WATER SUPPLIES: Stub hot and cold water supplies to each fixture and faucet in wirsbo aqua pex and fitting. Starting at the water meter throughout the house. Run 1” water supply to first junction.

   Location: Throughout the house

F. Install plumbing equipment in accordance with manufacturer's instructions, as required by code, and complying with conditions of certification, if any.

G. Coordinate with plumbing piping and related fuel piping work to achieve operating system.

H. Provide water & gas supply & flue piping

I. SUMP PUMP: Install new sump pump for draining of interior drain tile system and pipe out a discharge through the basement rim joist.

Location: Basement

J. DISPOSER: Provide & install a Badger 555 garbage disposal
Location: Kitchen

K. CLEAN OUT: Install clean out within 10’ of waste leaving the building; per code.

3.02. **LOCATIONS**

2.01 SINKS- **See Color & Material Sheet**

A. Kitchen Sink:
   1. Sink: Install a 22 gauge 33"x22"x8" double bowl, stainless steel, self-rimming kitchen sink. Manufacturer: Moen, Model number 2212, or like product to be approved by Project Manger
   2. Faucet: Manufactured by Moen, Patriot Series Pull Out Kitchen. Model #16929-SSSD-DST. Flow Rate: 2.0 GPM maximum
   3. Disposer: Badger 555 garbage disposal

B. Laundry Tub: **See Color & Material Sheet**
   1. Sink: Install single bowl, 24" fiberglass laundry tray to fin under faucet.
   2. Faucet: 1.5 GPM

C. Bathroom Vanities: **See Color & Material Sheet**
   1. Sink: 31 inch solid recessed oval bowl vanity top Manufactured by Imperial Marble. Model number RCxx22SPW
   2. Faucet: Single lever faucet with 1.5 GPM maximum flow rate- **See Color & Material Sheet**

2.02 DUAL FLUSH TOILET- **American Standard Cadet Toilets.**

A. Dual Flush Water Closets: ASME A112.19.14; high efficiency and low consumption, vitreous china, dual flush, tank type.
   1. Bowl: Elongated.
   2. Flush Actuator: Manufacturer's standard.
   3. Rough in: 12 inch (305 mm).
   4. Seat: Manufacturer's standard or recommended elongated closed front seat with lid.
   5. Color: White.

2.03 BATHTUBS- **See Color & Material Sheet**

A. Bathtub: ASME A112.19.4M porcelain on steel bathtub with slip resistant surface contoured front apron, 60 inches (1500 mm) long, White color.

B. Bath and Shower Trim: ASME A112.18.1; concealed shower and over rim supply with diverter spout, pressure balanced mixing valve, bent shower arm with adjustable spray ball joint showerhead with maximum 1.5 gallons per minute (5.6 liters per minute) flow and escutcheon, lever operated pop-up waste and overflow.

C. Neo Angle Shower: Sterling remodeler shower or equivalent.

PART 3 EXECUTION

3.01 INSTALLATION

C. Install flexible PEX piping with a minimum number of couplings to all fixtures. Install mechanical connectors and shut off valves if appropriate for each fixture.
   1. Sixe pipe to 1990 CABO minimums per table 2406.5
   2. Include clothes washer hook up.

D. Furnish and install all water piping and shut-off valves necessary to complete work.

E. Retrofit the water meter to comply with existing code.

F. Install components level and plumb.

G. Seal fixtures to wall and floor surfaces with sealant as specified in Section 07 9005, color to match fixture.

H. Seal around plumbing penetrations in all exterior surfaces, surfaces that border on unconditioned spaces, between floors, and through the exterior of the building.

I. Clean out basement floor drain at end for construction period and verify operation and function.
   1. Install new drain cover.

3.02 LOCATIONS

A. Exterior:
   1. Hose bibb - located east side of home.

B. Basement:
   1. Domestic Water
   2. Indirect-Fired Water Heater
   3. Floor Drain

FORCED AIR FURNACE AND DUCTS

PART 1 GENERAL-REFER TO NEC SPECIFICATION

1.01 SUBMITTALS

A. Product Data: Provide rated capacities, weights, accessories, electrical nameplate data, and wiring diagrams.

B. Product data indicating Heating, Cooling equipment and Ducts are in compliance with Air Conditioning Contractors of America (ACCA) Manuals, Parts J, S, and D. Alternate Compliance paths are as Follows:
   1. ASHRAE Handbooks

PART 2 PRODUCTS

2.01 GAS FIRED FURNACES

A. Annual Fuel Utilization Efficiency (AFUE): 0.95 ("condensing").

B. Units: Self-contained, packaged, factory assembled, pre-wired unit consisting of cabinet, supply fan, heating element, controls, air filter, humidifier, and accessories; wired for single power connection with control transformer.
   1. Safety certified by CSA in accordance with ANSI Z 21.47.
   2. Venting System: Direct.
   3. Combustion: Sealed
   4. Air Flow Configuration: Upflow.
   5. Heating: Natural gas fired.

C. Performance:
   1. HVAC contractor will be responsible to determine heat load using Manual J.

D. Cabinet: Steel with baked enamel finish, easily removed and secured access doors with safety interlock switches, glass fiber insulation with reflective liner.

E. Primary Heat Exchanger:
   1. Material: Hot-rolled steel
   2. Shape: Tubular type.

F. Secondary Heat Exchanger:
   1. Material: Aluminized steel.
   2. Coating: Polypropylene.

G. Gas Burner:
   1. Atmospheric type with adjustable combustion air supply,
   2. Gas valve, two stages provides 100 percent safety gas shut-off; 24 volt combining pressure regulation, safety pilot, and manual set (On-Off), pilot filtration, automatic electric valve.
   3. Electronic pilot ignition, with electric spark igniter.

H. Supply Fan: Centrifugal type rubber mounted with direct drive with adjustable variable pitch motor pulley.

I. Motor: Refer to Section 22 0513; 1750 rpm two-speed, permanently lubricated, hinge mounted.

J. Air Filters: 1 inch (25 mm) thick glass fiber, disposable type arranged for easy replacement.

K. Ducts: Install all new supply and return air ducting to code.

PART 3 EXECUTION

3.01 INSTALLATION

A. DUCTWORK: Provide & install properly sized ductwork for new forced air system. Route all new supply and return ducts through new and existing interior walls. Seal all duct joints with duct mastic. Relocate supplies & returns per new floor plan.

Location: Throughout the dwelling

B. DUCT CLEANING: Upon completion of the project, prior to final cleaning of the house, clean all supply and return ducts with rotary equipment.

Location: Throughout the dwelling

C. GAS PIPING: Demo all existing gas piping. Install gas lines to the stove, furnace, water heater, and 1st floor dryer to meet code. Include final connection to the appliances and 24 hour air test.

Location: Kitchen and basement

D. PROGRAMMABLE THERMOSTAT: Provide and install a digital Honeywell programmable thermostat or equivalent.

Location: 1st floor dining room

E. DRYER VENT: Provide and install a dryer vent for the 1st floor laundry to meet code.

Location: 2nd Floor laundry closet

F. MICROWAVE INSTALLATION: Install microwave & properly vent to the exterior per code.

Location: Kitchen

G. **RELOCATE & INSTALL 95% FURNACE: Install an Energy Star rated two stage American Standard or equivalent furnace with an AFUE of 95%. Variable speed, 80,000 BTU. Include PVC venting, gas piping drain piping, and low voltage wiring.**

Location: Basement

H. Install in accordance with NFPA 90A.

I. Install gas fired furnaces in accordance with NFPA 54.

J. Provide vent connections in accordance with NFPA 211.

K. The Contractor shall have all HVAC ducting cleaned by a professional duct cleaning company after all interior repairs are completed inside the house.

END OF SECTION

SECTION 23 6213

FORCED AIR A/C **$_____**

PART 1 GENERAL

1.01 SUBMITTALS

A. Product Data: Provide rated capacities, weights specialties and accessories, electrical nameplate data, and wiring diagrams. Include equipment served by condensing units in submittal, or submit at same time, to ensure capacities are complementary.

B. Design Data: Indicate pipe and equipment sizing.

PART 2 PRODUCTS

2.01 MANUFACTURED UNITS

A. Units: Self-contained, packaged, factory assembled and pre-wired units suitable for outdoor use consisting of cabinet, compressors, condensing coil and fans, integral sub-cooling coil, controls, liquid receiver, wind deflector, and screens.

B. Performance Ratings: Seasonal Energy Efficiency Ratio of 16

2.02 CASING

A. House components in welded steel frame with galvanized steel panels with weather resistant, baked enamel finish.

2.03 CONDENSER COILS

A. Coils: Aluminum fins mechanically bonded to seamless copper tubing. Provide sub-cooling circuits. Air test under water to 425 psig (2900 kPa), and vacuum dehydrate. Seal with holding charge of nitrogen.

2.04 FANS AND MOTORS

A. Weatherproof motors suitable for outdoor use, single phase permanent split capacitor or 3 phases, with permanent lubricated ball bearings and built in current and thermal overload protection.

PART 3 EXECUTION

3.01 INSTALLATION

A. 15 SEER AIR CONDITIONER: Provide and install a 2.5 ton, 15 SEER efficient American Standard Air conditioner or equivalent. Include A-coil, line set piping, drain piping, and low voltage wiring. **Model # 7A7A5030**. Location of the exterior condenser unit to be selected by project manager prior to placement of the condenser unit.

Location: Throughout the dwelling

B. Provide piping for refrigeration system as required.

C. Provide connection to refrigeration piping system and evaporators. Comply with ASHRAE STD 15.

END OF SECTION

SECTION 26 0001

POWER, WIRING AND DEVICES

PART 1 GENERAL **$_____**

1.01 SUMMARY OF BULLETIN 80-1 (Property Maintenance Code)

A. All hazardous, improper and/or illegal wiring shall be removed or required to the present Electrical Code. This will include other buildings on the property such as garages, sheds, etc.

B. Minimum size for all new services for single residential occupancies shall be 100 ampere, 240 Volt.

C. No additions or extensions will be allowed on an existing ampere services.

D. The Following are minimum requirements for new service installation:

1. **Electrical outlets required:** Every habitable room 120 square feet or less in area, of a dwelling or dwelling unit of a multiple dwelling shall contain at least two separate and remote duplex outlet shall be required for each additional 80 square feet or fraction thereof. Most new outlets must be Arc-Fault Circuit Interrupters (AFCI) protected according to Section 210.12 of the 2008 National Electrical Code.

2. **In Kitchens:** Three separate and remote duplex outlets shall be required. At least one of the required duplex outlets shall be supplied by a separate twenty ampere circuit. Any new receptacle installed for the counter top shall be of the Ground Fault Circuit Interrupter (GFCI) type.

3. **Every public hall, water closet compartment, bathroom, laundry room and furnace room must contain at least one electric light fixture.** In addition to the light fixture, every bathroom and laundry room must have at least one duplex outlet. The required duplex outlet in each laundry room must be on a separate twenty ampere circuit. The required duplex outlet in each bathroom must be of the (GFCI) type. Any existing outlets in any bathroom must be converted to a GFCI-protected outlet or removed. The required GFCI outlet in the bathroom must be immediately adjacent to the sink. If a bathroom is added or gutted as part of the update, a 20 ampere circuit will be required per NEC 210.11(C) (3).

4. **Every common hall and inside stairway** in every residential structure or dwelling unit shall be adequately lit with an illumination of at least five lumens per square foot in the darkest portion of the normally traveled stairs and passageways.
5. **All exterior exits and entryways** are required to be illuminated a minimum of one foot-candle at grade level for security.
6. **Exterior lighting** at garages is required to be adequate so as to not endanger health or safety. An average of one foot-candle at the pavement is required. Exterior lighting must be in conformance with other city codes.
7. **Basement:** One lighting outlet is required for each 200 square feet of floor space. At least one of the required basement lighting outlets shall be switched form the head of the stairs.
8. **Smoke Detectors:**
   a. All single-family dwelling shall have a hard-wired (120 volt electrical, not battery) battery-backup smoke detector installed near (not in) the bedrooms. If there are legal bedrooms on more than one level, the detector shall be installed on the level that has the greater number of bedrooms. If there are an equal number of bedrooms on more than one level, the detector shall be installed on the upper level near the bedrooms.
   b. If the project includes building construction that requires a Building Permit, additional hard wired interconnected and/or battery-type smoke detectors are required per the Building Code.
9. **Metallic Light Fixtures (Luminaries):** If within five feet horizontally or eight feet vertically of grounded surfaces (metallic piping, concrete floor, etc.) must be grounded.

10. **Residential Closet Lights:** All closet lights must either be a florescent fixture (luminaire) or an enclosed incandescent fixture of the types required by the present Electrical Code. Fixtures must not be directly over the storage area in a closet; they must either be moved or eliminated and blanked off.
11. **Service conduits run in outside walls:** If a 100-ampere service is changed from fuses to circuit breakers, the meter is already outside, and the existing conduit is run in the outside wall, the conduit may be re-used. If the service is an upgrade (increase in amperage), conduit in the wall may not be re-used.

1.02 SECTION INCLUDES:

A. Rewire house to code

B. Overhead Garage Door Opener: **SEE SECTION 08 3323**

C. Certify Electrical Distribution: Electrician shall inspect all exposed wiring, motors, fixtures and devices for malfunction, shorts and hosing code compliance. Non-functioning and dangerous equipment and wiring shall be replaced

D. Replace existing electrical service with a residential, 150 amp, single phase, 3 wire electric services to the basement.

PART 2 PRODUCTS

2.01 APPLICATIONS

A. Conduit and Cable: Provide materials that meet code requirements.

B. New Service: Include a main disconnect, 22 circuit panel board, meter socket, weather head, service cable, and ground rod and cable. Seal exterior service penetrations.
   1. New service panel shall conform to the BOCA Existing Structures code.

C. Devices and Cover plates: Provide all White or Ivory devices per Project Managers Selection. Provide heavy duty residential grade devices.

D. Smoke/CO Detectors: Hard wired w/ battery-back up type units

E. Doorbell system: System containing a low voltage transformer, power connection, buzzer and front door button.

F. Equipment Wiring: Provide the correct power supply on separate circuit, with over current protection including all connecters for the Water Heater, Boiler, Microwave, Refrigerator, and Dishwasher.
   1. Kitchen Receptacles to be 20 amp Circuits:
      a. Install small appliance circuits along counter tops to code.
         1) Evenly dividing the number of countertop appliance receptacles between 2 circuits.
         2) GFCI receptacles when they fall within 6 feet of sink.
      b. Individual circuits for permanently installed appliances; range, dishwasher, exteriorly vented Microwave with Range hood and refrigerator to code.

G. Bathroom Vent Fan/Light Fixture: Shall be Energy Star rated ceiling mounted fan/light fixture rated for a min 100 watt exterior ducted vent fan capable of a minimum of 80 CFM
   1. Product: NuTone QTREN080FLT or like product to be approved by the Project Manger
   2. Switch: Light and fan shall use same switch with a time delay for fan such as the EFI/Light Time Delay Switch Part # 5100.505 or equipped with a humidistat sensor.
   3. Ducting: Install 4" metal duct and vent to the exterior ideally through a gable end using a 4" hooded vent with damper.
      a. All duct seams shall be sealed with duct mastic. Insulate duct work with vinyl or foil faced R-6 minimum duct insulation.
      b. Repair any damage to the ceiling installation or air seal fan/light assembly to the ceiling with low VOC caulk.

H. GFCI Receptacles: Install flush mounted, ground fault circuit interrupted ivory duplex receptacle adjacent to lavatory using copper Romex.

2.02 MATERIALS

A. All materials shall be UL approved and/or National Electrical Code rated.

PART 3 EXECUTION

3.01 INSTALLATION-

SEE MATERIAL & COLOR SHEET ON ALL ITMES DEALING WITH MATERIAL

1. GENERAL: Electrical Contractor to secure an electrical permit prior to starting work and will be responsible for all inspections. Inspect the entire electrical system. Repair, replace, and install new as per plans, project manager, and code requirements. Surface metal raceways and boxes for outlets, switches, and fixtures not permitted in finished living areas. Knob & tube wiring to be replaced when exposed and accessible. Some walls to be removed and others to be added; see plans. Electricians to make an inspection and remove hazards after interior walls are demolished; per plans. All light fixtures to be energy star rated by including CFL light bulbs or approved equivalent. Lighting fixtures to be chosen by the Owner

   Location: Throughout the dwelling

2. Wire dwelling to a minimum of Bulletin 80-1. Add new outlets on arc fault breakers where new wall or open walls exist.

   Location: Throughout the dwelling

3. Provide & install interlocked smoke detectors in all bedrooms and one a common area on each level. Install interlocked combination smoke and carbon monoxide detectors in hallways within 10 feet of each bedroom door. Detectors to be on an arc fault circuit.

   Location: Throughout the dwelling

4. Install GFI outlets in all code required areas.

   Location: Throughout the dwelling

5. Install exterior, weather protected, GFI outlets.

   Location: One on the front exterior wall & one on the rear exterior wall

6. Provide & install a 3-way switch at all stairways. Provide & install 3-way switches in all hallways over 6 feet long. Provide & install 3-way switches where passing through rooms. Verify all new switch locations with the **Project Manager.**

   Location: Throughout the dwelling

7. Every room and closet to have a switch and a light. Verify locations with the project manager.

   Location: Throughout the dwelling

8. Provide & install exterior lights at all exits. **SEE MATERIAL & COLOR SHEET**

   Location: Exterior

9. Wire all bathrooms to code with a light over the vanity and a ceiling light. Wire the bathroom fan, provided and installed by the HVAC Contractor, in each bathroom. Avoid fan/light bath fan combo units where possible due to the bulb spectrum conflicts with the vanity lights.

   Location: All bathrooms

10. Provide & install electrical boxes under all light fixtures.

    Location: Throughout the dwelling

11. Provide & install cable outlets and phone jacks

    Location: All bedrooms and family room

12. Wire new furnace and central air units

    Location: Basement & exterior

13. Provide & install a laundry circuit for gas dryer. Verify location with project manager. Add sump pump outlet near new interior drain tile sump pump.

    Location: Basement

14. Provide & install a GFI outlet above the water heater.

    Location: Basement

15. Provide & install a hard-wired doorbell for the front door.

    Location: Front entry door exterior wall

16. Wire above kitchen countertops to plan. Provide for dishwasher with above countertop switching. Provide & install a microwave outlet. Wire range to be a 220, 50 amp; provide whip and receptacle. Install under mount cabinet lighting with above counter switching to include hi-low rocker switches on the body. Kitchen walls to be opened 48" high up from the sub-floor at countertop locations.

    Location: Kitchen

17. Provide new underground service and wire new garage. Wire, provide, and install two interior lights, two wall outlets, one garage door opener outlet, a motion floor light above the service door, and one motion wall sconce above the overhead garage door.

    Location: Garage

18. Install a paddle fan/light combo unit in the master bedroom and the living room with two switches.

    Location: Master bedroom & living room

19. Install in accordance with manufacturer's instructions.
20. Building Codes: The extent of electrical work indicated in the Scope of work is stated generally to indicate end result of work. The Contractor is responsible for making a thorough inspection of the site to determine the full extent of work required to achieve the end results. All electrical work must meet current building code requirements and must pass City of Saint Paul field inspection. Any work that does not meet codes or pass inspection must be corrected to the satisfaction of the city inspector at no additional cost to the Owner.
21. Remove and dispose of all abandoned wiring and devices. Modify existing wiring and devices as indicated.
22. All new wiring, when passing through living areas, shall be concealed.
23. All new receptacles and switches
24. All new outlet covers and receptacles: White
25. All drilling, cutting and fastening shall be neat and true, and shall not critically damage framing members.
26. All patching shall match the surrounding surface.

3.02 LOCATIONS

A. Throughout
   1. House
   2. Garage

HRA LIGHTING

PART 1 GENERAL **$_____**

1.01 PRICE AND PAYMENT PROCEDURES

PART 2 PRODUCTS

2.01 INTERIOR LIGHTING

A. Lighting

1. Product Series: Brush Nickel Finish-**See Color & Material Sheet**

B. Other Acceptable Manufacturers: To be approved by Owner

2.02 EXTERIOR LIGHTING

A. Garages: DualBrite 300 watt motion security light with shields: Model SL-5318-WH-D

B. Exterior Wall Mount Front Door: **See Color & Material Sheet**

C. Exterior Wall Mount Back Door: **See Color & Material Sheet**

2.03 BASEMENT LIGHTING

A. Stairway: One fixture on stairway landing and one at the bottom of the stairway. One switch at the top of the basement stairway to control these two lights.

B. Provide switched light in laundry area and Mechanical area.

C. Additional ceiling mounted pull chain lights in various locations throughout the basement where necessary.

PART 3 EXECUTION

3.01 INSTALLATION

A. Install in accordance with manufacturer's instructions.

B. All new wiring when passing through living areas shall be concealed.

C. Wire mold and surface mount boxes for receptacles.

D. Install luminaires plumb and square and aligned with building lines and with adjacent luminaries.

3.02 LOCATIONS-See Color and Material Sheet

A. BASEMENT:

1. Replace all with new Energy Efficient Bulbs

B. MAIN LEVEL: **See SECTION 26 0001 #6 in installation POWER, WIRING AND DEVICES**

1. Front Entry – Ceiling fixture, 3-way wall switch at latch side of door.
2. Living-room – Ceiling fixture, switches at front entry doorway.
3. Kitchen - Ceiling Mounted
4. Side Entry - ceiling light
5. Stairway to basement- ceiling light on 1/2 up landing, switch at top.
6. Bathroom-Vanity Light, wall switch. Fan and Ceiling light have separate wall switches.

C. UPPER LEVEL: **See SECTION 26 0001 #6 in installation POWER, WIRING AND DEVICES**

1. Hall - ceiling light, wall switch
2. Bedroom 1 - Ceiling fixture
3. Bedroom 2 - Ceiling fixture

4. Bedroom 3 - Ceiling fixture
5. Bathroom - Vanity Light and Fan switch 2-way wall switch...

D. EXTERIOR: **See SECTION 26 0001 #6 in installation POWER, WIRING AND DEVICES**

1. Front porch - Wall fixture, wall switch interior next to front door.
2. Rear entry - wall sconce, wall switch interior next to front door.

END OF SECTION

SECTION 28 1600
INTRUSION DETECTION

PART 1 GENERAL **$_____**

1.01 SUMMARY

A. Provide and install a security system, to include a minimum of hardwired control panel with cellular transmitter (no phone line required), 2 hardwired keypads, three (3) Door sensors, motion detector, low temperature monitoring and siren.

B. Include a monthly monitoring service at a rate not to exceed $50/month.

C. Contracts for monitoring must be month to month, not an extended period.

D. Monitoring shall begin upon completion of construction and be paid by Owner.

1.02 QUALITY ASSURANCE

A. Conform to requirements of NFPA 70.

B. Products: Furnish products listed and classified by Underwriters Laboratories Inc. as suitable for purpose specified and indicated.

PART 2 PRODUCTS

2.01 ALARM CONTROL PANEL

A. Control Panel: Modular construction with surface wall-mounted enclosure.

B. Power supply: Adequate to serve control panel modules, remote detectors, and alarm signaling devices. Include battery-operated emergency power supply with capacity for operating system in standby mode for 24 hours.

2.02 INITIATING DEVICES

A. Magnetic Switches:

B. Motion Detectors:

2.03 SIGNAL DEVICES

A. Alarm Bells: NFPA 72, electric single stroke, 8 inch (200 mm) bell with operating mechanism behind dome. Sound Rating: 81 dB at 10 feet (3 M).

PART 3 EXECUTION

3.01 INSTALLATION

A. Install in accordance with manufacturer's instructions.

B. Use 18 AWG minimum size conductors for detection and signal circuit conductors. Install wiring in cable.

C. As soon as System is installed contact HRA Project Manager by email to inform him/her to apply for a security permit.

3.02 CLOSEOUT ACTIVITIES

A. Demonstrate normal and abnormal modes of operation, and required responses to each.

END OF SECTION

SECTION 31 2200

GRADING

PART 1 GENERAL **$_____**

PART 3 EXECUTION

2.01 ROUGH GRADING

A. When excavating through roots, perform work by hand and cut roots with sharp axe.

2.02 FINISH GRADING

A. FINISH GRADING: Placing topsoil delivered by truck, finish grading 6”

Location: 6’ wide around the perimeter of the house and the garage.

B. YARD CLEAN UP: Remove all debris and volunteer growth from yard.

Location: Exterior yard

C. Build up ground slope at foundation wall using clean fill.

D. New fill shall have an approximate slope of 1/12 and extend away from the foundation wall approximately five feet.

E. Adjust slope for new window wells

F. Remove roots, weeds, rocks, and foreign material while spreading.

G. Vigorously tamp or roll new fill to achieve settled depth.

H. Fine grade topsoil to eliminate uneven areas and low spots. Maintain profiles and contour of subgrade.

I. TREE REMOVAL: Remove existing Catalpa tree as indicated on the landscape plan.

Location: Exterior lot. South Elevation. See Landscape Plan

J. SHRUB REMOVAL: Remove the Ash shrub as indicated on the landscape plan.

Location: Exterior lot. Northwest Elevation. See Landscape Plan

K. STUMP GRINDING: Grind existing tree stump and Catalpa tree stump, once the tree is removed, as indicated on the landscape plan

Location: Exterior lot. South and West Elevations. See Landscape Plan

L. EXTERIOR DRAIN TILE: Install a 4” exterior drain tile, including pop-up riser with elbow, from the North elevation corners of the house to the new rain garden locations where mixed sized river rock is to be installed. Install 9” x 9” catch basins on the locations shown on the landscape plan.

Location: Exterior, See Landscape Plan

2.03 LOCATIONS

A. See Site Plan.

This house does have a rain garden

END OF SECTION

SECTION 32 9223

SODDING

PART 1 GENERAL **$_____**

PART 2 PRODUCTS

2.01 MATERIALS

A. Sod: TPI, Certified Turf grass Sod quality; cultivated grass sod; type indicated in plant schedule on Drawings; with strong fibrous root system, free of stones, burned or bare spots; containing no more than 5 weeds per 1000 sq. ft. (100 sq. m). Minimum age of 18 months, with root development that will support its own weight without tearing, when suspended vertically by holding the upper two corners.

PART 3 EXECUTION

3.01 LAYING SOD

A. SOD: Install sod; labor, and materials, Install 2” deep black dirt prior to laying sod.

Exterior: Entire yard

B. Moisten prepared surface immediately prior to laying sod.

C. Lay sod immediately after delivery to site to prevent deterioration.

D. Lay sod smooth and tight with no open joints visible, and no overlapping; stagger end joints 12 inches (300 mm) minimum. Do not stretch or overlap sod pieces.

E. Water sodded areas immediately after installation. Saturate sod to 4 inches (100 mm) of soil.

3.02 MAINTENANCE

A. General Contractor is responsible for the maintenance of sod until project closeout.

3.03 LOCATION

A. See Landscape Plan/Rain garden plan

END OF SECTION

SECTION 32 9300

PLANTS

PART 1 GENERAL **$_____**

1.01 PRICE AND PAYMENT PROCEDURES

A. Allowances: See Section 01 2100 - Allowance of $1500 for plants, mulch and other material included in Landscape Plan.

B. This allowance does not cover sod, materials for a retaining wall or labor

PART 2 PRODUCTS

2.01 PLANTS

A. Plants: Species, size and quantity identified in Landscape Plan, grown in climatic conditions similar to those in locality of the work.

2.02 MULCH MATERIALS

A. Mulching Material: Hardwood species wood shavings, free of growth or germination inhibiting ingredients.

PART 3 EXECUTION

3.01 RAINGARDEN INSTALLATION

A. Remove 6”-12” inches of soil leaving compacted 3 to 1 side slopes rising to finished grade. Use excavated materials to create a berm with a 6” ponding depth and cover with C125 erosion control blanket and secure per manufactures directions. Rain garden overflow locations on show on the landscape plan.

B. Deeply till and break apart basin floor beyond compaction.

C. Add 6 inches amended soil (75 percent course washed sand and 25 percent MNDOT grade II compost).

D. Finish Rain garden by hand grading a flat, level basin and 3 to 1 side slope, as indicated on Landscape Plan.

E. Add 3-inches of shredded hard wood mulch, as with slopes

F. Install edging as indicated on Landscape Plan.

G. Ensure that downspout runoff enters the rain garden.

3.02 PLANTING

A. Set plants vertical according to the Landscape Plan.

B. Saturate soil with water when the pit or bed is half full of topsoil and again when full.

3.03 MAINTENANCE

A. Provide maintenance at no extra cost to Owner; Owner will pay for water.

3.04 LOCATION

A. As indicated by the Landscape Plan/Rain Garden Plan

END OF SECTION
